The Freestyle wave!

After a sensational success in the 4 batten sizes of the 2010 version, we worked 6 months between Australia and Canaries to obtain the same results also on the bigger sizes. Therefore now the whole range from 3.7 to 6.3 is on a 4 batten structure

The new 5.7 and 6.3 result in having more power, lighter feel (1kg less!) and better stability than last year's model.

The weight of the product has gone through a methodical research in order not to leave on the side the durability and quality of the product: We did not go hunting for particular or super technical sailing materials to save the 30grams on a meter square as those type of materials have a delamination problem in staying only for a short while in the normal windsurfing conditions!

Ideal mast:
Challenger Sails FSW99
Challenger Sails FSW99 ULTRA

Colours: ACID GREEN, BRIGHT ORANGE

DIMENSION	BOOM	LUFF	BATTENS	MAST	IMCS	EXTENSION	ALTERNATIVE MAST
3.7	147	368	4	340	16	28	370
4.2	154	387	4	370	17	18	
4.5	158	396	4	370	17	26	400
4.7	162	401	4	400	19	2	
5	166	412	4	400	19	12	
5.3	171	424	4	400	19	24	
5.7	178	434	4	430	21	4	
6.3	182	453	4	430	21	24

k.onda

K.onda has reached the objective to take over any other wave line in the group due to its perfection, and we are therefore proudly presenting it as the only wave sail in our sail range, and the only one you will need for your quiver.

The 'S Shape' profile allowed the K.onda to keep profile absolutely in place the profile while surfing waves, especially for a total comfort in the jumps.

The sail transforms itself from according to the trim. By adjusting the downhaul and boom tension, you can decide to have a perfect balanced on shore wave sail or very neutral side shore sail.

The stability, acceleration, power and light feel, will leave you breathless. In the gust, the sail profile stays locked in giving no chance for it to move backwards and have pressure on the back hand: the S-Shape will support this force and leave you with a extreme comfort.

A real technical innovation that needs to be experienced!

Ideal mast:

Challenger Sails FSW 99

Colours: ACID GREEN, BRIGHT ORANGE
