Exocet is standing out as one of the most innovative and fastest growing brands in the industry offering a versatile range of boards from easy accessible entry level concepts to the state of the art high end freeride, wave and racing machines.

The new **Pro model** constructions combining high tech carbon fibre and Technora or Technora Kevlar amazingly bring the weight to volume ratio down to a level never before obtained. Reduced weight, enhanced response and speed are the outstanding features of these new toys.

Exocet is serving more than 50 countries world wide, and the aim is to offer only the best and most reliable products at all levels.

Thanks for riding with us.
It is part science, part passion, all yours.

Patrice Belbeoc'h

Exocet se distingue comme une des plus innovante et dynamique marque de l'industrie du windsurf, en proposant une gamme de flotteurs très complète depuis les produits d'apprentissage ultra accessibles jusqu'aux flotteurs de vague, freestyle, freeride, slalom et formula les plus haut de gamme.

Nos nouvelles constructions "Pro model" associant fibres de carbone et tissus Technora et Technora Kevlar abaissent le ratio poids / volume à des valeurs jamais obtenues précédemment sur des flotteurs de série. Poids plume, centre de gravité reculé et nervosité de ces nouveaux jouets se combinent pour offrir des sensations exceptionnelles.

Exocet distribue ses flotteurs chez les meilleurs revendeurs en France, et dans plus de 50 pays à travers le monde, avec l'ambition de toujours proposer le meilleur en termes de performances, de fiabilité et de service.

Merci de naviguer avec nous.
Notre science et notre passion, à votre service

Patrice Belbeoc'h

Classic wave riding in anything from big hollow surf to small mushy waves. The aggressive squash tail provides flawless release. Snappy and maneuverable, the **U-surf** shatters the myth that only narrow boards turn.

A true surfboard feeling.

Dans le swell le plus creux et massif comme dans les petites vagues molles, son square tail agressif permet à la **U-Surf** de tourner sur place et de tenir la courbe quelles que soient les conditions. Radicale mais stable, la **U-Surf** fait la preuve qu'une planche de vague ne doit pas forcément être étroite pour bien tourner !

Les sensations d'un pur surfboard!

FEATURES

An exceptionally early planer that slashes burns and slides like nothing else. A truly adaptable concept appealing to first time short boarders, all round cruisers, new school freestyle and heavy weight waveheads.

Compact, comfortable and absolute control.

Un flotteur exceptionnel, tout autant pour son fabuleux départ au planing et sa vitesse que pour son aptitude à déchirer dans les vagues. Planche idéale pour débuter sur petit flotteur, outil parfait pour s'essayer au freestyle, flotteur de freeride ultra maniable et performant, excellente planche de vagues petit temps pour les plus lourds : la **Cross** offre la polyvalence absolue !

Contrôle hors pair, confort et maniabilité.

CROSS

FEATURES

- **Progressive V shape**, Slight V in the tail running all the way to the nose for power carving and stability through turns.
- **Compact and wide**, instant planing, one pump and off you go.
- **DDSA**, Double density shock absorber for ultimate comfort.
- **Innovative Rail** design to accommodate a "do it all" free style wave board.
- **Bump and jump / Freestyle / Wave**, just up to your choice and your feel of the day.
- New **2009 Footstraps**, super comfortable and easy to adjust.

Light and luxurious the **I-Style** low end grunt and lightening fast rocker line get you fired up and instantly into action. Featherweight control and response, and the unique rail bevels create loads of power. This **pure freestyle** concept takes the rough with the smooth. **Puts you in a spin.**

Sa ligne de rocker magique fait de la **I-Style** une vraie balle dans les petits airs : elle vous propulse instantanément au cœur de l'action et ses rails rentrés et biseautés lui apportent toute la glisse et la puissance nécessaires. Légère et superbement finie, c'est une véritable plume sous les pieds, avec à la clé un contrôle et une réactivité hors norme. Un concept exclusivement dédié au freestyle, qui offre un mélange unique de douceur et d'explosivité.

A vous faire tourner la tête!

MICHAEL ROSSMEIER (AUT 256)

Take the fast track to advanced windsurfing. The Nano copes effortlessly with all conditions, and is the ideal platform for progression. Early planing, stability and superb maneuverability equals the expressway to success.
The launchpad to excitement.

Prenez le plus court chemin pour progresser en windsurf : les Nano savent s'adapter à tous les plans d'eau et à toutes les conditions et elles sont parfaites pour commencer à accéder à la navigation sportive. Planing rapide, stabilité et excellente maniabilité sont les clés de son grand succès.

Le plaisir de naviguer, avant tout!

TECHNOLOGY ASA

SHAPED FOR YOU

SCROSS

The SCross deliver extremely early planing, and being compact also offers much more control and forgiveness in all maneuvers. Speed gybes becomes a breeze. Comfort and performance blends together, emphasizing the bases of our policy; effortless high performance. The subtle lines of the shape will assist you doing maneuvers in "auto pilot" mode. Undisputed test winner in almost all major magazines world wide.

Absolute freeride.

La Scross part comme une fusée au planing et son shape compact la rend extrêmement rapide, facile à contrôler et tolérante. La planche se pilote sans effort, y compris dans le jibe qui est d'une facilité déconcertante, même à pleine vitesse. Ce savant mélange, à base d'une grande accessibilité, d'un confort royal et de performances de pointe a valu à la SCross de remporter la plupart des tests dans les magazines spécialisés du Monde entier.

Le freeride à l'état pur

FEATURES

- DDSA: Double Density Shock Absorber
- New construction
- Deep tucked under rail in the front section for improved comfort in all conditions.
- New 2009 Footstraps, super comfortable and easy to adjust

WARP S & S PRO

The Warp S series is a pure evolution from its successful predecessors, capable of carrying bigger sails with ease due to the extended wet surface. It is becoming a **real weapon in light wind**, planing up ultra quick with 10 m² sails. A very competitive contender at the highest level Slalom World cup events.

Faster and easier.

La nouvelle gamme **Warp S** est dans la lignée des fameuses **Séries S**, par rapport auxquelles la surface mouillée plus importante des **Warp S** permet de les charger un peu plus en toile. On peut en effet facilement monter à 10m², ce qui renforce encore les performances générales dans le petit temps. Cela en fait des armes redoutables en course, y compris au plus haut niveau.

Plus facile, plus rapide!

WARP SL

As always we are prizing comfort and control to aid top speed and maneuverability.

The triple level ergonomic power pads allow you additional grip and power when needed in heavy and critical conditions. In light wind you will have the advantage of having a perfect straight stand creating more lift while in strong wind the board remains extremely comfortable even in very rough and "unmanageable" situations.

Blistering speed combined with comfort.

Comme toujours, nous avons privilégié le confort et le contrôle afin de favoriser la vitesse de pointe et la maniabilité. Les pads à triple niveau offrent tout le grip et la puissance nécessaires, quel que soit l'état du plan d'eau. La position plus droite que par le passé est un avantage quand il faut faire lifter la planche dans le petit temps, tandis que les gains en vitesse et en contrôle sont flagrants dans les maxis, même quand les conditions deviennent "sauvages" !

Une vitesse supersonique dans le plus grand confort.

FEATURES

- **DDSA:** Double Density Shock Absorber
- **E.U.R:** Exocet Unique Ride

WARP FORMULA

GONZALO COSTA HOEVEL [ARG 3]

FEATURES

- **Power pads:** double level ergometrical EVA foot pads
- **Race straps:** 4 new light weight race straps
- **Carbon look:** mat sanded finish

The famous "Black Machine" needs no further introduction. Arguably the most talked about Formula board, with its **aggressive carbon look** and **without a gram wasted** the lightest contender on the market. Simply a performance boost at all angles of sail, and still a very easy board to control.

No compromise.

La déjà fameuse "Black Machine" n'a guère besoin d'être longuement présentée, tant elle a fait parler d'elle, avant même sa sortie officielle, dans le petit monde de la Formula: pour son look agressif et son poids incroyablement léger tout d'abord, mais aussi et surtout pour ses performances de pointe à toutes les allures et son contrôle incomparable dans les conditions difficiles.

Sans aucun compromis.

| Model | Warp Formula 100 |
|---------|---------------------------|
| Volume | 158 litres |
| Length | 233 cm |
| Width | 100 cm |
| Weight | 8.3 kg (+/-6%) |
| Fin box | Deep tuttle |
| Sail | 8.4 - 12.5 m ² |

WARP X

□ □ PATRICE BELBECH [F-811]

The **Warp X** concept allows racing in any conditions from sub planing breeze to full force gales. Finally the fun of the past met the potential of the future. The innovations start at the tail, with a step tail adapter extending the water line providing effortless glide in light winds. With or without the adaptor, the **high aspect X fin** provides exceptional speed at all angles of sail.

The all condition racing concept.

FEATURES

- **Adjustable mast track**
- **Plunger**: makes release of the daggerboard from the case effortless.
- **Dagger**: Powerful wide foil dagger for light wind
- **Low drag race fin**: Narrow cord for speed at all angles.
- **Adjustable plate**

TECHNOLOGY Custom made wood & carbon

La **Warp-X** a été conçue pour permettre de régater par tous les temps, que ce soit dans le vent fort que dans les conditions de non planing. Elle associe sans nul doute des sensations issues du passé au potentiel de performance d'une planche futuriste. L'innovation fondamentale tient à sa "double carène" amovible à l'arrière, qui est un apport indéniable en termes de polyvalence, de glisse et de plage d'utilisation. Avec ou sans plaque, et à toutes les allures, les performances de la warp-X sont "boostées" par l'aileron "high aspect", spécifiquement développé pour elle.

La performance ultime en régate, dans toutes les conditions!

The **Cruiser** concept is specifically designed for the recreational market with soft, comfortable full EVA decks and easy integrated transportation wheels at the tail. The Cruiser **L** and **M** are equipped with retracting daggerboards, and the smaller Cruiser **KJ** with a removable centerboard. The ultimate Kids board in a modern, compact, maneuverable, fast and easy to sail package.

Your entrance to Windsurfing.

Bridging the gap between wide learning platforms and progressive short or longboards, makes the **Match** a reference of its own. The board is **extremely stable**, quick on the plane and gybes with ease thanks to the soft rounded off rails. With excellent speed and maneuverability, it is also a very competitive racing board with its related **hybrid** all round performance. **The perfect Match.**

Les **Cruiser** ont été tout spécialement développés pour un usage loisirs avec leur pad EVA intégral et leur roue de transport intégrée à l'arrière. Les modèles **M** et **L** disposent une dérive rétractable. La **Cruiser Kid Junior** possède, elle, un système de dérive amovible : ce flotteur moderne, très rapide et maniable mais particulière facile d'accès est, sans aucun doute, tout simplement le meilleur support disponible actuellement pour les enfants sur le marché.

Le Windsurf pour tous!

Située à mi chemin entre une planche d'initiation et les flotteurs les plus performants de la gamme Exocet, la **Match** est une nouvelle référence, en étant tout autant capable de satisfaire un pratiquant expérimenté que de servir d'outil d'apprentissage ! **Extrêmement stable** et rapide au planing, la Match est aussi très maniable : les jibes et autres manœuvres sont un vrai jeu d'enfant ! Avec sa bonne vitesse de pointe et sa manœuvrabilité, la Match peut même s'aligner sans complexe au départ d'une régate de Raceboard.

Le match parfait !

**EXO RACE PRO STRAP**

The race pro is designed with weight saving in mind, and 9 different positions ensure a very precise fit. Only 90 grams dry, and hardly absorbing any water.

Le Race Pro a été conçu pour un gain de poids maximal, tout en assurant un maintien très précis avec un réglage à 9 positions.

Pesant à peine 90 grammes à sec ce footstrap absorbe très peu d'eau.

EXO STANDARD STRAP

The Exo standard strap is a very easy and functional footstrap.

Notre nouvelle version de footstrap ajustable, encore plus fonctionnelle et confortable.

**NOSE GUARD**

"Glue on" high impact shield, dispersing the contact energy to a larger area preventing the nose from breaking.

Available for
Scross MC/PRO 95, 105, 115, 130, 145
Nano 125, 155

PROTECTION DE NEZ

Ce "bouclier" en composite protègera le nez du flotteur des pires impacts en dispersant l'énergie sur une large surface. A coller.

Disponible pour les modèles suivants:
Scross MC/PRO 95, 105, 115, 130, 145
Nano 125, 155

**BOARD BAGS**

Only premium materials to provide ultimate board protection. Five different sizes and several added features like the external fin pocket and numerous handles for easy carrying.

Available:

- New design** size
 - Board bag 240 x 55
 - Board bag 245 x 58
