For the last 25 years F2 has lead the way, setting benchmarks that push the limits of windsurfing ever further. The new F2 boards are new pioneers at the forefront of design.

The permanent goal is to design better boards and as always it stays the basis of our development: Faster, more manoeuvrable and easier, constantly striving for better performance. Taking new ideas and pushing them further than ever before.

Breathtaking features like the adjustable cut-outs in the new FX, the test winning air pipes, customizable wave board graphics or the new Spice wave-slalom board concept, give the terms innovation, sportiness and dynamic an explosive note.

Get your new F2 board and set your personal benchmark.

»» CREATORS OF THE FUTURE

R&

For the last 3 years our shaper Patrik Diethelm has pushed the boundaries with his innovative and revolutionary board designs. His skills in the shaping room are only matched by his skills on the water. With huge success at national and international level he is not only shaper, but has the experience on the water. Together with his assistant Daniel Aeberli they test and race, together with the team, helping to push board design ever further.

This unique combination of a top team, continuous test sessions and a full time shaping program has enabled Patrik and his team to develop new boards in slalom, speed, waves and freestyle giving an incredible board range for 2007. Good boards come from an experienced team that live for windsurfing.

>> F2 SPEED CHALLENGE

>> HOW FAST ARE YOU?

SPEED₀₇ CHALLENGE

Speed for everybody - For the last 2 years The F2 Speed Challenge has provided the perfect platform for all recreational speed sailors, racing against the fastest sailors from over 6 countries. More and more speed addicts inscribe for the challenge and go all out to beat the country's fastest time and win the grand prize. The fastest sailor from each country wins a trip to Fuerteventura and

free entry into the ISA Speed World Championship. There you have the chance to compete against the Speed World Record holder Finian Maynard and mix it up with all the F2 team.

So check out all info on www.f2-surf.com and inscribe now ! Action on the water is guaranteed thanks to the F2 lightning match races.

Patrik Diethelm ITA-120

>> F2 TEAM

Our team riders deliver Records, world cup victories and much more year by year and made F2 the number

1 brand on the PWA tour in 2005.
The best proof of successful shapes.

VICTORIES ON F2 BOARDS 2005/2006

1st places at formula events:

2005	Midwinters Champion, Florida	Gonzalo Costa-Hoevel
2005	Marina Open Champion, Saipan	Gonzalo Costa-Hoevel
2005	US Open Champion	Devon Boulton
2005	North American Formula Champion	Devon Boulton
2005	South American Formula Champion	Gonzalo Costa-Hoevel
2005	Euro Cup Formula Champion	Allison Shreeve
2005	Australian National Formula Champion	Allison Shreeve
2005	Dutch Formula Champion	Dennis Littel
2005	German Champion Formula & Overall	Bernd Flessner
2005	Polish Formula Champion men	Przemek Miarczyński
2005	Polish Formula Champion women	Zocha Klepajka
2005	Polish Freestyle Champion	Kuba Kosmowski
2005	Polish Wave Champion	Przemek Miarczyński
2005	1st at European Formula Championships, Rhodes	Allison Shreeve
2005	Formula State Champion, Sydney	Allison Shreeve
2005	Oceanic Champion, Elwood, Melbourne	Allison Shreeve
2005	US Open Champion, Texas	Devon Boulton
2005	Formula World Champion	Allison Shreeve
2006	Formula Oceanic Champion	Allison Shreeve
2006	South American Formula Champion	Gonzalo Costa-Hoevel
2006	Formula European Championships men	Ross Williams
2006	Formula European Championships women	Allison Shreeve

1st places at slalom events:

2005	Boracoo International Funboard Cup Champion	Gonzalo Costa-Hoevel
2005	German Champion Slalom & Overall	Bernd Flessner
2005	IFCA Slalom World Champion	Karin Jaggi
2005	IFCA European Slalom Champion	Finian Maynard
2005	1st at IFCA European Slalom Championships	Allison Shreeve
2005	PWA Slalom 42 World Champion	Karin Jaggi
2005	South American Slalom Champion	Gonzalo Costa-Hoevel
2005	Polish Slalom Master Cup	Andrzej Ozog
2006	1st at PWA Indoor Belgium	Karin Jaggi

Records:

2005	Outright Speed Sailing World Record, St. Marie de la Mer	Finian Maynard
2005	Woman Speed Sailing World Record, Marie de la Mer	Karin Jaggi
2005	Production Board Speed Sailing World Record, St. Marie de la Mer	Dave White
2005	Outright Nautical Mile Speed Sailing World Record, Walvis Bay	Finian Maynard
2005	Suisse nautical mile record women	Karin Jaggi
2005	German nautical mile record women	Christine Pihan
2005	Italian nautical mile record men	Patrik Diethelm
2005	Slovenian nautical mile record men	Tine Slabe
2005	Italian Speed Record	Patrik Diethelm
2005	Slovenian Speed Record	Tine Slabe
2005	Woman Speed Sailing World Record (A Class), St. Marie de la Mer	Allison Shreeve

Other victories:

2005	1st at European Freestyle Tour, Hyeres	André Paskowski
2005	PWA SuperX World Champion	Karin Jaggi
2005	IFCA Freestyle World Champion	Karin Jaggi
2005	ISA Speed World Champion	Karin Jaggi
2005	IFCA Production Speedsurfing World Champion	Asain de Gendt
2005	IFCA Production Speedsurfing World Champion	Christine Pihan
2005	1st at Soulwave Windsurfing	Peter Volwater
2005	UK Triple Crown Champion	John Skye
2005	Swiss Freestyle Champion	Daniel Aeberli
2005	PWA Rookie of the year 2005	Junko Nagoshi & André Paskowski
2006	1st at EPFT Tarifa	André Paskowski
2006	1st at PWA Indoor Belgium, Freestyle	Karin Jaggi

NEW NAME - NEW SHAPE

Like no other board, the new XTC does it all. With a new name, new shape and new design concept, it doesn't matter what you want to do. Going fast, jibing, freestyle or just cruising, all at once! Simply the best all-round board.....pure ecstasy!

If you are after just one board and are torn between high speed blasting with 4 straps and a slalom sail, doing the latest freestyle tricks with 3 straps or just cruising over the water.....there is only one choice: XTC !!

Peter Vowles H-24

A slalom oriented rocker-line brings the board onto the plane rapidly, accelerating and blasting with top speed over the water. The outline is dealt with the bends of a freestyle outline providing an enormous agility with a high running smoothness at the same time.

Double concaves in the tip area let the board ride smoothly through the water. The transition of double concaves to a flat V provides very early planing and a free sailing sensation. The flat V in the back section provides maximum top speed. Without Cut Outs, but with a strongly increasing V on the last 30 cm the board excites you with its incredible free planing position.

The round harmonic deck gives you amazing comfort in all conditions whether you sail with 3 or 4 straps. The perfect rail shape is not too thin and not too thick, exactly right to provide comfort and sailing smoothness when you go fast or turn with your XTC.

boardcover	F2 Medium	250x67	F2 Large	255x70		F2 Xtra Large	260x80

The Scoop-Rocker-Line has been individually adapted to each size. The contact surface of the Stokes 135, 145 and 155 is longer guaranteeing early planing in the lighter winds.

The Stokes 95, 105, 115 and 125 have a reduced contact surface which offers an insane top speed whilst at all times

remaining comfortable and controllable. Because of the more stretched outline these sizes gain a maximum control.

All boards are trimmed towards early planing and top speed in the corresponding wind ranges.

Parallel double concaves with stabilizing side flats give the board a smooth ride through the chop. This then transitions into a flat V, which lifts the board between the mast track and the front strap, resulting in exceptional early planing and a free sailing sensation. Lastly flat V in the tail section gives the board its maximum speed.

Steffi Wahl G-303

A harmonic and flat distribution of volume throughout the board provides stability and a secure stance for all occasions.

The Stokes 95, 105, 115 and 125 have more dome under the feet giving an even more comfortable stance at top speed.

All Stokes are equipped with thin rails and lots of tuck providing incredible jibing, perfect control and an amazing sailing smoothness. The Cut Outs deliver explosive acceleration when getting onto the plane plus high speed and an unbelievably smooth ride!

Who doesn't remember the legendary F2 Sunset Slalom of former days ? A true allrounder and everybody's darling, especially for cruising and going fast. Now it's back ! The new edition to celebrate the 25-year anniversary of F2, equipped with a modern Freemove/Slalom shape, guaranteeing the best manoeuvrability and the hottest speed duels.

Very early planing, high top speed and very good jibing abilities – the new F2 Sunset, you will simply love it, again!

The Scoop-Rocker line has been transferred from the new XTC and modified slightly, letting the board get onto the plane exceptionally early and creating the smoothest of rides. Thanks to the excellent control, going fast becomes pure fun.

The outline is based on the original Sunset-Slalom, but modified to suit the cut and style of the modern sails. The great advantage of this outline is in the gybing, providing speed through the turn and a planning exit is made easy! Double concaves in the front area give the board a smooth ride through the chop. This then transitions into a flat V, which lifts the board between the mast track and the front strap, resulting in exceptional early planing and a free sailing sensation. Lastly flat V in the tail section gives the board its maximum speed, increasing strongly in the last 30cm to provide breathtaking acceleration and a free planing position.

The round harmonic tail gives a great feeling and stance on the board no matter if you are blasting, cruising or jibing. The rails are not too thick and not too thin – just right to enjoy the comfort and the running smoothness when going fast or jibing

The name SX has become the benchmark at almost all national and international slalom competitions in terms of acceleration and top-end speed.

We added a new, smaller member to the family which shows our dedication to this discipline and leaves nothing left to be desired in slalom races held in 40-knots of wind. With the new edition to our successful slalom board range, we have surpassed even our own high expectations by providing much more control whilst maintaining the exhilarating performance sailors have grown accustomed to with the SX.

Specialists and weekend sailors alike have experienced our new racing machines to be very easy and forgiving to sail. It is almost like one is consistently riding in pole position on the straight legs and around the racing marks. 100 % control and maximum performance on all courses.

air PIPES

Patrik Diethelm ITA-120

We offer an unchanged Scoop-Rocker-Line for 2007 because thorough testing has proven over and over that we have optimized the bottom curve for now. We are sure that the new boards will provide incredible speed, stability and perfect balance whilst sailing at the limit.

The lifted nose lets the new SX go smoothly over the chop, especially while pointed downwind.

The narrower tail brings better control, less back leg pressure and makes jibing much easier. At the same time the modern, short and wide drop-shape provides a lot of control and excellent maneuverability.

The parallel double concaves with stabilizing side flats run into a flat V. This combination has been proven through systematic testing to bring the maximum potential from our boards in terms of speed and acceleration, a must for the modern slalom discipline.

The 'low back foot' deck shape running from the front feet towards the tail is a very good platform for the ideal sailing posture. The S-Deck shape is a very good platform for the ideal sailing posture. Meanwhile the lower mast foot position provides perfect control due to a lower center of gravity for the rig.

The thin rails support very controlled and easy jibing with a high degree of grip, an essential part of a successful racing jibe.

The new design and geometry of the Cut-Outs (SX S-XXL) releases turbulences thanks to the rounded

channels running alongside the cut-out walls. Our shaper Patrik Diethelm pioneered this innovation and this simple idea has seen marked improvement in the behaviour of the board over chop and has almost completely eliminated spin-outs.

The new generation of the SX range (SX S-XXL) have been equipped with adjustable cut-out plates.

The depth of the cut-outs (SX S-XXL) can be easily trimmed with different adjustment positions. With high wind simply fix the plates in the position which minimizes the depth of the cut-outs and therefore almost eliminates the cut-out effect. This has been tested to significantly increase the control of the board in hard conditions by forcing the nose down.

With light to medium winds we recommend to adjust the cut-out plates much deeper into the cut-outs, so that you get the maximum cut-out effect. This option releases the board to its' full speed potential and creates a situation where all the SX boards have a tremendous wind range.

Bigger diameter 'air pipes' (SX S-XXL) release the vacuum in the Cut-Outs much faster than the previous slalom models. This has been tested on multiple occasions in varying conditions. 'Air pipes' eliminate the turbulences associated with trapped air in the cut-outs, the final piece to the puzzle for the SX range and without question the best line of slalom boards on the market today.

SX

»» TOP SPEED WITHOUT LIMITS

He who wants to advance has to want to engage in the pursuit for more. One who is looking for the unique has to leave already well travelled roads. Speed boards fascinate us because they are the technical trendsetters and carriers of modern innovations. This is proven by F2 with our two new speed machines, the Missile XS with a weight under 4 kg and the Missile S with adjustable Cut-Outs, Air Pipes and the S-Deck-Shape.

Fish Maynard F2 World

It is unbelievable how speedsailing has established itself back into the marketplace! Not only professionals but also a lot of amateurs and intermediate sailors take part in speed events these days. Everybody wants to compete against the clock and F2 is the leading force in this trend. We offer the best weapons in the industry for being ahead of your friend or competitor and now with two sizes to choose from there is nothing that can stop from winning any longer!

AIR
PIPES

Karin Jaggi Z-14

The world record Scoop-Rocker-Line directly from the custom boards of Finian Maynard and Karin Jaggi has been transferred 1:1 to our new production boards. The outline of Finian's and Karin's world record breaking speed machines has also been used in the new production Missiles! Control is the most important factor at high speed - the better and more confident you feel, the more you can sheet in and accelerate. The bottom shape is a direct duplicate from the world record custom boards; double concaves with stabilizing side panels running into a flat V.

Double concaves in the front let the board run smoothly through chop. The flat V in the tail section provides stability and unlimited speed. The S-Deck gives a very comfortable position for the feet as the back foot is lower than the front enabling the rider to maintain the ideal sailing position for longer while increasing the wind range of the board. The lower mast foot position provides perfect control due to a lower center of gravity for the rig. Boxy rails let the water release smoothly therefore avoiding the board getting sucked into the water, a common problem in speed boards today. In competitions they also provide good pointing ability to get back to the top of the course and promote easy starting for such a low volume board.

Adjustable Cutouts with airpipes (in Missile „S“ only): In order to achieve top speeds in medium winds, which is very difficult, we added Cutouts and Airpipes to the Missile S. For good control in higher winds the Missile S is also equipped with adjustable cut-out plates to be able to trim the board according to your body weight and the conditions on the day, a new speed innovation from F2 that will greatly increase the range, control and top-end of this board.

» PURE RACING

FORMULA

The new FX V Formula board takes it to the maximum with almost every windrange. The outstanding performance and dominance of our racing machine lies in the extremely wide tail. The FX V has a tail width of an impressive 83 cm measured 30 cm from the tail. This makes it unbeatable especially going upwind. The adjustable cut outs provide the exact trim needed for perfect control in all wind strengths.

In order to keep the high top end speed with such a wide tail, the scoop rocker line has been adjusted and the bottom flat has been shortened by 3 cm. Furthermore the V in the front of the board has been increased and wide bevels have been added so that the rails don't dip into the chop. The scoop-rocker line has been raised under the mast track area in order to get a smoother ride over chop and small waves. Parallel double concaves with stabilizing side panels let the board ride smoothly through the ocean and give a very stable sense of drive and control. A flat bottom in the tail area provides maximum acceleration and a sustained top speed that is not compromised by concaves. The new FX provides impressive pointing performance with its 6 cm wider tail. The new board also has 5 cm less overall length which helps high wind sailing considerably. Going upwind at a very steep angle is now possible without too much problem. A very thin, flat and V like volume distribution reduces the weight, which tends to become an issue with the ever growing Formula boards these days. The stance of the back foot is now significantly higher than the front foot which helps to build up much more pressure with the rear leg resulting in easier sailing and a more direct loading of the fin. Get the perfect trim for your FX with the adjustable cut outs. The weight optimized Air Pipes are only 5 cm deep and lead exactly into the cut-outs which eliminates nearly all the vacuum, the sure solution that provides the explosive acceleration towards the finish line and first place.

>> CLASSICAL RACING WITH A NEW BOARD CONCEPT FROM 8-30 KNOTS

The F2 Lightning - an old familiar name, yet a completely new board concept. All advantages of classic race boards and formula boards were combined in one shape. Equipped with the cut-outs and the new bump-deck shape, the Lightning Regatta offers surfers 100% high-tech allowing them to be the fastest both in weak winds under 8 knots and in planning winds up to 30 knots.

Flat scoop-rocker line over a board length of 285 cm for perfect performance under both planning and weak wind conditions

Wide tail, straight outline, and long straight rails for early planning, easy upwind moves at weak winds, and full control with dynamic riding properties at strong winds

Bump-deck shape for better foot grip when pumping

Mono-concaves at the front for a smooth ride through choppy waters and a strong lift for very early planning. Double concaves near the mast rail help avoid hitting the chop too hard. A flat V in the tail for maximum speed.

Extremely wide bevels cause the board to tilt to the lee side when overtaking, which on the one hand produces less friction on the side of the board facing the wind and, on the other, offers a lot of edge surface to cross faster and higher.

WAVE/SLALOM

SPICE

**CARBON
WOOD
SANDWICH**

The F2 Spice is a whole new concept. The perfect board. Blending the manoeuvrability of a wave board with the speed and excitement of a slalom board.

A revolution in board design!!

4 straps for flat water bump and jump conditions and 3 straps for the use in moderate waves. Common Wave-Freestyle boards are usually too wide for going fast and a pure wave board is usually too small and too nervous for the common use on flat water. The new Spices are the perfect bump and jump boards by providing top speed and top manoeuvrability in all kind of flat waters and moderate waves.

boardcover	F2 Small 244x62		

A modified slalom rocker-line with a bit more rocker offers very early planing, good acceleration, high top speed and very good manoeuvrability.

A stretched and harmonic outline provides much comfort and manoeuvrability without limiting the top speed.

The Spice has a very fast and easy controllable bottom shape. The double concave and stabilizing side flats smoothes out the ride through chop, whilst the transition from double concave to a flat V provides good lift leading

to increased early planing and a very free feeling. The flat V in the tail gives you maximum speed.

The round harmonic deck with a 3 and 4 strap option provides a lot of comfort.

The rail shape is a mixture between wave and slalom rails. Not too thin and not too thick, exactly right to provide comfort and sailing smoothness when you go fast or turn with your Spice

Freestylers who know what they are doing will instantly love the new Chillis. 2 freestyle boards aimed 100% towards new school freestyle, making even the most difficult of moves easy. Best planing, fast acceleration and incredible pop with even the slightest foot pressure. From Vulcans to Burners these boards will give you the edge.

Twist, Slide and Style!

The unchanged rocker-line stands the test of time and like the 3 generations before, it gives the best in early planing and fast acceleration. A new more harmonic outline lets the Chilli slide and turn like a disc. Flat Vee lets the water rip off cleanly during the most complex manoeuvres, plus with a slight additional double concave in the tip the new Chilli provide total fin first control.

CHILLI

Tonky Frans NB-7

The perfectly designed deck shape guarantees the best stance in all crazy moves. The slightly domed deck allows thin rails over the whole length without any loss of volume.

Tucked rails give a smooth ride, control and grip in turns. Thin rails let the Chilli turn like it was on rails.

The new tail shape combines the cut outs and spock tail with a whole new edge geometry. This gives the Chilli an amazingly free planing position, unbelievable pop and complete safety whilst sliding backwards.

>>> OUTGROW BEYOND YOURSELF

The new Guerillas lift the fascination of wave windsurfing to the next level - thanks to new innovative shapes for a playful application in everything from small side-onshore waves, to bigger side-offshore waves. They steer easily over the back foot in small waves and at the same time slice very cleanly through the water during full speed lay down bottom turns.

The new Guerilla Range 2007 fits perfectly to the individual ranges of use no matter if you sail in down-the-line, on-shore or wave-freestyle conditions !

WAVE

GUERRILLA

Peter Volwater H24

The new outline of the Guerillas gets onto the plane very early, provides top acceleration and has a bit more bias towards down-the-line conditions, without decreasing the performance in onshore conditions.

A new pin tail at the Guerilla 69 adds more liveliness and high sensitivity for exact reactions to foot steering.

A wide and short nose provides perfect control whilst also giving safety and forgiveness during late white water cut backs.

The outline of all 3 sizes still stands for very early planing, top acceleration and an enormous stability.

A single concave running into a double concave gives the Guerillas lots of running smoothness, control and thanks to a sharper rail more grip and incredible carving abilities when turning over the rear foot.

A slightly reduced dome deck lets the board react instantly to foot pressure.

Keep it simple
A very price competitive complete rig with only one mast size for all sizes.
Perfect for all windsurfers who want to keep it simple without any hi-tech or over - engineering.

The performance oriented sail design fits to all modern but also old style boards. Exclusively high quality materials provide light weight and a high durability. The compact luff and the short boom length gives the glide best manoeuvrability. The modern batten tensioner provides effortless batten trimming

>>> EASY SURFING WITH VERY GOOD JIBING AND PLANING PERFORMANCE

A beginner's board that's fun for everyone. This new board was designed to turn beginners into advanced surfers within just a few hours.

The Discovery is extremely stable, easy to handle, has a dynamic riding feeling when gliding, and makes jibing extremely easy. Suddenly, gliding on a beginner's board becomes the easiest thing in the world, and the Discovery mutates to a power jibing disciple's best friend.

The Hornet's bottom shape concept with parallel double concaves turning into a flat V results in great control, forgiving ride properties, and a lot of gliding fun.

The Hornet outline concept also makes sure that the Discovery remains stable on the water when going fast, giving beginners a quick reward for their learning efforts.

A single concave and a narrow deck outline immediately guide beginners to the centre of the board. The double rail deck shape in the tail section makes sure that the feet are positioned further toward the centre, thus preventing the board from tilting windward while gliding.

Thanks to the double rail concept, the bottom edge is very much thinner than with conventional beginner's boards, turning jibing into a real joy.

The Discovery also features tail cut-outs, so that even advanced surfers or surf instructors can enjoy a free and dynamic gliding position.

The very easy adjustable dagger board provides good stability and keeps the board in direction on all courses.

» F2 ELEMENTS – THE ELEMENTARY TRAVEL MATES

Attention to detail is what determines the function and design of our new line of accessories. Well-designed

handles and carrying straps put an end to inconvenience on long trips. The most durable materials guarantee a

long service life even after countless adventurous journeys on conveyor belts and in cargo compartments.

F2 CD/DVD COVER

Hard outside and soft inside. Attractive Guerilla design, and a real act of mercy for your CDs or DVDs

F2 SUNGLASS COVER

Protect your shades from sand, wind and accidental wipe-outs in your luggage with our padded sunglass case

F2 ROOFSTRAPS

Extremely safe mount on the car roof for up to 4 boards. The well-designed Velcro fastener ensures safe storage and quick release when there's no time to lose

F2 HIP BAG

30 C°, scorching sun, you're in your favourite shorts, but have no space for small change, sunglasses, and sun lotion? A thing of the past. Simply strap your F2 hip bag around the hip and you are ready for those hot summer days on the beach

F2 COMPUTERCASE

The organised home for every laptop

Features:
"Slide-on" function for the telescopic handle of the F2 trolley
Detachable padded notebook compartment
Organiser
Mobile phone / iPod bag

F2 WASH KIT

Features:
Large inside compartment with many individual compartments for accommodating several body care products
Hook for hanging

F2 DAYPACK

Pack all that necessary stuff into the Day Pack and head for the beach or the office

Colour:
Forest green / black

Dimensions:
48cm x 16cm x 35cm; 26l

Features:
Expandable wet compartment
Padded compartment for notebooks
Padded bag for shades
Inside organiser
iPod bag
Drinking bottle holder
Mobile phone bag
Air circulation system in the back part

F2 TROLLEY

Ideal for a short trip over the weekend. Perfectly adjusted hand luggage for all airplanes helps avoid annoying check-in procedures at airports. Easy transportation on 2 wheels using the telescopic handle, or simply by strapping it on the back as a rucksack. Besides, the upper part can be easily detached from the rest with a plug-type connector and be used as a rucksack.

Dimensions:
5 cm x 20 cm x 40 cm

Features:
Padded compartment for notebooks
Inside organiser
Mobile phone / iPod bag

F2 SPORT BAG

Features:
Expandable floor
Wet compartment for shampoo and wet textiles
Comfortable carrying handle and shoulder strap

F2 TRAVEL BAG

The light weight bag for long trips. Also carries all your sports items to the gym.

Features:
Large main compartment
Wet compartment for shampoo and wet textiles
Comfortable carrying handle and shoulder strap

F2 ROLLER BAG

Enough space for all travel accessories. Wheels and large handles ensure easy transport while travelling.

Features:
Split bag incl. 4 zipper compartments on the upper side
3 zipper compartments on the inside
Extended zipper on the upper half of the bag
Solid floor with 2 ball-bearing wheels
Extra large handles for carrying and pulling

>> F2 ELEMENTS – THE ELEMENTARY TRAVEL MATES

BOARD BAG LIGHT FLIGHT M+L for up to 4 boards

Colour Combination:
 Grey / Black

Dimensions:
 M: 250cm x 67cm
 L: 255cm x 100cm

- Features:
 - 3 internal protected compartments
 - 6 mm padding and additional nose and tail protection
 - Front and rear handles

BOARD BAG WORLD CUP M+L for up to 4 boards

Colour Combination:
 Grey / Black

Dimensions:
 M: 250cm x 67cm
 L: 255cm x 100cm

- Features:
 - 4 internal protected compartments
 - with padded compression straps
 - 10mm padding and additional nose and tail protection
 - Front and rear handles

BOARD COVER XS - XXL Colour Combination: Grey / Black

Dimensions:
 XS: 235 x 58
 S: 244 x 62
 M: 250 x 67
 L: 255 x 70
 XL: 260 x 80 or 85 (SX XL)
 Formula: 243 x 100
 Xantos: 265 x 76

- Features:
 - 6mm foam padding
 - centred side handles

F2 FLIP FLOPS

F2's cult flip flops with convenient cork cushion. Available in beige and blue.

F2 SPEED VEST

The lightweight F2 speed vest offers maximum protection and buoyancy while ensuring maximum freedom of movement. The special shape design allows for an unhindered use of the hook. The vest is an indispensable safety product for all speed windsurfers. It offers protection from hard impact on the water or on material as well as the possibility of adding additional weight by inserting lead plates (not included) into the compartments for world speed records. The speed vest is not a certified life vest.

F2 ROOF RACK PADS

Protect your board with these soft roof rack pads, and avoid damage during excursions on the car roof

» WESTERN AUSTRALIA

ON THE GLOBAL WINDSURFING STAGE, WESTERN AUSTRALIA TRULY IS AS GOOD AS IT GETS.

You'll be hard-pressed to find more idyllic - and less crowded - windsurfing conditions in the world, and guess what? There's no catch. The Indian Ocean is clean, pristine and staggeringly unpopulated.

Don't expect ritzy multi-storey resorts or rows of plastic deckchairs - Mother Nature is the undisputed star of this show. On offer is fresh air, squeaky-clean beach sand, a vast, sapphire-blue sky and eternal sunshine.

WA boasts 12,000km of unspoilt, uncommercial coastline offering everything from flat water, to bump and jump, to powerful waves.

HERE'S JUST A SAMPLE OF WHAT'S ON OFFER:

LANCELIN

Lancelin is a tiny crayfishing town blessed with a dishevelled, beach-shanty charm. Located 1.25 hours from Perth, it is home to the legendary Lancelin Ocean Classic and is renowned for its jumping and waveriding. Lancelin has a long stretch of flat water on the inside and several reef breaks at the back, making it a rare windsurfing gem able to challenge the most experienced wavesailors and nurture the novices. Other attractions: Lancelin is home to over 2km of pure white sand dunes (perfect for sandboarding, dune buggy driving and four-wheel driving), fruitful fishing, breathtaking sunsets, historic shipwrecks and an abundance of sea lions and dolphins.

MARGARET RIVER

Rich in gastronomic spoils, Margaret River - located 3.5 hours south of Perth - is also garnering rave reviews for its advanced windsurfing conditions. The main break is a solid, left-hand wave that powers across the reef, with the swell often mast high or more. This is where the best in WA sail, but be warned: these waves can be unforgiving. This spot is strictly for the crème de la crème of wavesailors.

Other attractions: Margaret River is also home to spectacular surfing and swimming beaches, tall timber forests, ancient

The ocean is powered by the Fremantle Doctor, a commanding sea breeze that blows in from the left and creates ideal port tack sailing conditions.

Every skill level, from beginners to professional world champions, can enjoy WA's supreme spoils.

In fact, some of the world's most revered wavesailors - such as F2 sailors Karin Jaggi and Pete Volwater - make an annual pilgrimage to WA's premium windsurfing hotspots (Pete even owns a house in Margaret River).

caves, cheese, chocolate and fudge factories and over 150 premium wineries.

GERALDTON

Geraldton is a spirited country town located 4.5 hours north of Perth. It offers a variety of great sailing spots and best suits those who prefer strong winds (which can range from 5.5 down to 3.5). Coronation Beach is the most popular spot for wavesailors - awesome jumping conditions and easy wave riding can usually be found from October to March. Other attractions: Geraldton is also home to stunning natural wonders (including the Abrolhos Islands), intriguing dive wrecks, flourishing wildflowers and rambling mountain-bike trails.

DON'T FORGET

Be sure to check out more exceptional windsurfing in WA at Ningaloo Reef (11 - 15 hours north of Perth) and Esperance (7.5 hours south east of Perth).
