GOYA WINDSURFING™

HOME OF THE FINEST WINDSURFING GEAR™

WELCOME TO THE WINDY YEAR

GOYA WINDSURFING is a rider driven company- the proof is our product.

A passion for windsurfing is shared by the entire GOYA organization. We love to windsurf, and we love to progress as riders- evolving our products is simply the result of this motivation.

*At Goya Windsurfing we develop the entire windsurfing experience: boards, sails and the rig components you need to enjoy what we consider the most fun sport on earth. Our priority is performance and the range to meet any windsurfers need, from beginner to expert and in all conditions.
Have a great windsurfing day,*

Francisco Goya

ULTRA LIGHT AND STRONG SCRIM X-PLY

Stronger and lighter! Improved low end performance, improved overall handling and improved durability. This is a standard feature for all PRO sails.

POLY CLEW OUTHAUL SYSTEM

This new outhaul system provides the option of a longer and higher boom position at the clew for optimized lift and power, or a lower and shorter position for maximized flexibility and maneuverability in the sails. This is a standard feature for GURU, ECLIPSE, NEXUS and STORM.

NEW 011 FEATURES

CARBON FIBER AND KEVLAR STRETCH CONTROL SYSTEM

Directly linked to the single clew and Poly Clew outhaul system, this system of ultra low stretch tendons massively increases the range of the sail by stabilizing the draft position cut in to the sail. This stable draft allows for a full profile that gets you going when the wind is light, and gives you ultimate control when the wind cranks up.

Jason Diffin: "GURU 2011 is the ultimate wave and high wind performance sail. Major advancements in materials and component technology create a new GURU model that has better low end, is lighter, and is more tunable than ever. The sail is easy incredibly easy to handle and depower even in the most radical conditions, and the GURU still offers the trademark flexible and comfortable feeling it has become famous for."

Freeride / Freerace

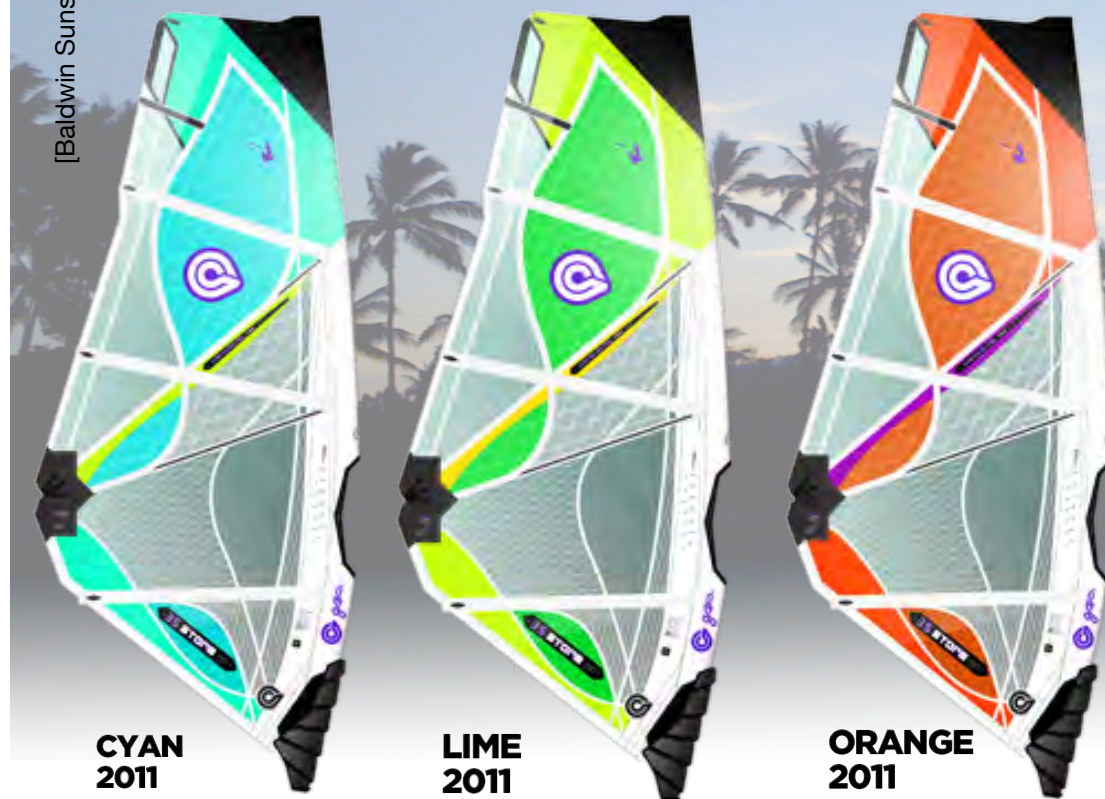

Jason Diffin : "NEXUS 2011 is pure freeride and freerace performance. While cut for power, speed and control in all sizes, the focus is on maneuverability in 4.3-6.9 and lift and control in sizes 7.5, 8.2 and 9.0. Forward and focused drive and crisp, easy handling make NEXUS the "go to" sail for maximum performance in bump and jump and flat water conditions."

Storm Pro blo

Kid's
performance

Jason Diffin: "STORM 2011 is the sail for kid's high performance windsurfing. The STORM design is based on the GURU concept- flexible and easy control along with a forward driving power delivery. For 2011 the STORM is significantly lighter, improving the overall handling characteristics of the sail to make as easy to ride as possible.
