

2012 Goya

WINDSURFING SAIL RANGE

This presentation gives you a brief overview of the Goya products available this year. For more information and up to date news, events and our blog, please visit us online.

Goya Windsurfing is a rider driven company, the proof is in our products. The passion for windsurfing is shared by everyone involved in making this brand possible. We love to progress, as riders and as a company. Evolving our products is the simple result of this motivation.

At Goya Windsurfing we develop the entire windsurfing experience: boards, sails and the rig components you need to enjoy what we consider the most dynamic sport on earth. Our priority is to offer premium performance in a consolidated range of gear designed to meet any windsurfer's needs anywhere in the world, any time.

PRO™ CONSTRUCTION Our most advanced sail construction combines light weight and excellent durability by blending the latest in scrim film technology and durable X-Ply. These premium sails are equipped with Carbon Stretch Control™ tendons, the Poly Clew™ angled outhaul system and Kevlar® Real Frame™ panels.

LIMITED COLOR COMBINATION

Ivory without the bad conscience. You have all been asking for it ever since the very first pictures of Levi destroying Hookipa with his colorless prototypes.

Well here it is, the White Edition. The only color you will find on these sails is the trademark Goya violet, used for some of the bare essential printing. Other than that, these sails are pure, no frills, trend resistant windsurfing products.

2012 Eclipse

PRO POWER WAVE SERIES™

For further reduced weight and an even more direct feeling, we produce a Monofilm version of the 2012 ECLIPSE, called the Eclipse Mono, Replacing the main X-Ply window panel with 7 MIL Monofilm. It is available in the same sizes as the Eclipse. The clear window creates perfect visibility and a slightly crisper feel for those eager to squeeze the ultimate performance out of their gear.

The 2012 Eclipse Mono is very desirable to use for Freestyle and Greestylewave applications, offering you even more lift than the original version, surpassing it's juicy light wind power supply with direct delivery and great high wind control.

New for 2012 are a much lighter construction weight, resulting in a stronger and lighter feeling on the water, as well as a stronger, more elaborated built. On top the Eclipse Mono now comes with more forward power delivery with improved high end control.

PRO™ CONSTRUCTION Our most advanced sail construction combines light weight and excellent durability by blending the latest in scrim film technology and durable X-Ply. These premium sails are equipped with Carbon Stretch Control™ tendons, the Poly Clew™ angled outhaul system and Kevlar® Real Frame™ panels.

MO NO

MONOFILM WINDOW

More window. More oceanscape. Less weight. Less effort. The Eclipse Mono is a little extra altitude added to the pinnacle of Goya Sailmaking.

2012 Banzai

PRO QUAD WAVE SERIES™

The all new Four Batten BANZAI is a low-end focused, power wave and maneuver sail, with quick and constant power delivery. The reduced batten count and super light scrim materials throughout, make the construction utmost light. Stability is achieved through the unique Carbon Fiber Stretch Control System that supports the entire sail body, and the large monofilm window offers incredible visibility.

The BANZAI's low end range is massive because of it's power profile, lightness and responsiveness. When paired with a modern high volume board, the BANZAI will allow you to use a smaller size sail than before. For example an average size guy on a Custom Quad 84 can use a 4.6 BANZAI when normally riding a 5.0 GURU or ECLIPSE.

The BANZAI concept is all about generating as much lift as possible in a smaller sail size. Because of the tight leech and central draft profile, the BANZAI provides extremely quick planing, plus quick and responsive handling in maneuvers. Super quick rake and sheet angle adjustments are effortless on this sail. The huge monofilm window provides incredible visibility through the sail allowing you to anticipate your path through the water ahead.

2012 Freesurf

ECO CROSSOVER SERIES™

The 2012 FREESURF offers an entry into high performance wave style sailing at an attractive price. Incorporating key features of the premium models, the FREESURF is powerful, light, and easy to handle in a wide variety of conditions. First jibe, first jump, or just blasting along, the FREESURF is pure and simple windsurfing fun.

ECO™ CONSTRUCTION These sails are a win win for both you and mother nature. They are at the same time economical and ecological by making use of factory overstocked genuine Goya foils and cloth. Hence the need and impact of producing new materials is reduced considerably, saving energy, raw materials and waste.

2012 Nexus

ECO FREERIDE & FREERACE SERIES™

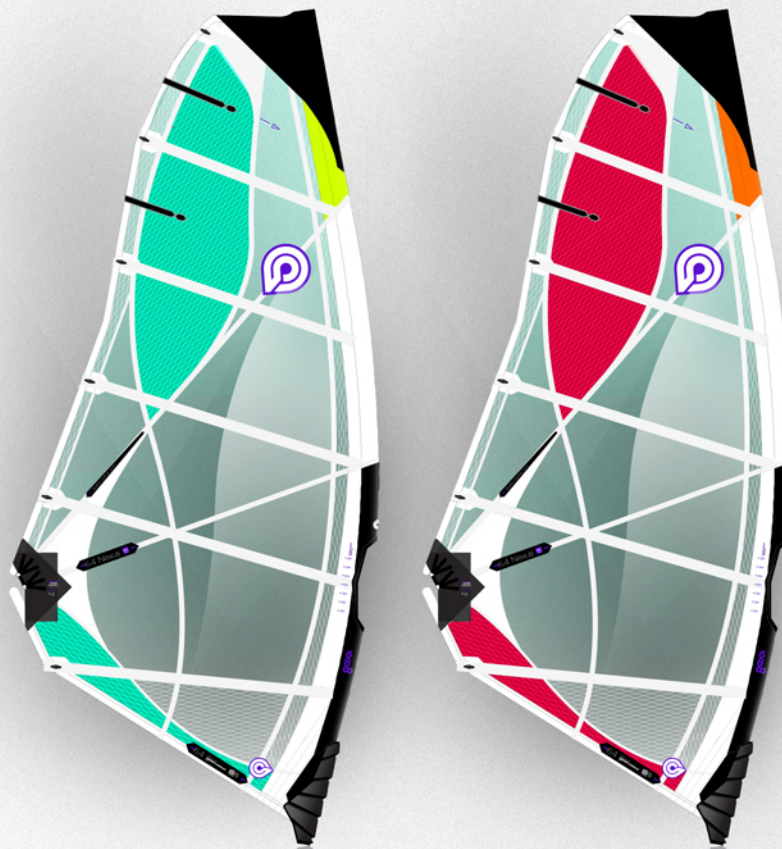

The 2012 NEXUS is a No-Cam Freeride & Freerace sail that supplies the maximum of power, speed and control in the Goya Sail range. The NEXUS is pure performance. While cut for power, speed and control in all sizes, the focus is on maneuverability in sizes 4.3 to 6.9 and lift and control in sizes 7.5 to 9.0. Forward and focused drive and crisp, easy handling make NEXUS the "go to" sail for maximum performance in bump and jump and flat water conditions.

Sizes 4.3 to 6.9 come as a six batten design, while sizes 7.5 to 9.0 come with seven battens, offering maximum drive while sharing the same built and features.

ECO™ CONSTRUCTION These sails are a win win for both you and mother nature. They are at the same time economical and ecological by making use of factory overstocked genuine Goya foils and cloth. Hence the need and impact of producing new materials is reduced considerably, saving energy, raw materials and waste.

2012 Storm

PRO CONTROL WAVE SERIES™

The 2012 STORM is the sail for kid's high performance windsurfing. The STORM design is based on the GURU concept. Flexible and easy control along with a forward driving power delivery. For 2012 the STORM is again significantly lighter, improving the overall handling characteristics of the sail to make the Storm as easy to ride as possible."

The Storm uses unique super light Scrim, in extensive areas of the sail's surface. Bright colors are used, so you can see your little sailor on the water. Areas prone to more wear are featured in X-Ply. The perimeter of the sail is reinforced with Kevlar panels.

PRO™ CONSTRUCTION Our most advanced sail construction combines light weight and excellent durability by blending the latest in scrim film technology and durable X-Ply. These premium sails are equipped with Carbon Stretch Control™ tendons, the Poly Clew™ angled outhaul system and Kevlar® Real Frame™ panels.

2012 Surf

ECO FUN & BEGINNER SERIES™

The 2012 SURF is the sail of choice for all instructors, windsurf schools and self-taught adventurers. With it's full dacron panels, reinforced perimeter, integrated mast pad, and indestructible Ever Clear window, it is a sail that will last for years. Lightweight and durable.

A full head batten and a short leech batten provide stability in both light and strong winds. Adjustable head webbing allows compatibility with any RDM mast. A large viewing window provides clear and durable sight through the sail. Bright colors make it safe and easy to spot on the water, and fun to look at.

It's the sail we've designed to teach our own children. The SURF is the perfect choice for learning to up haul and for learning the basic principals of sailing.

ECO™ CONSTRUCTION These sails are a win win for both you and mother nature. They are at the same time economical and ecological by making use of factory overstocked genuine Goya foils and cloth. Hence the need and impact of producing new materials is reduced considerably, saving energy, raw materials and waste.
