

### Performance

For 2007, the Redline has evolved into the ultimate Slalom sail - a lightweight, mid-width sleeve answer to the world record breaking Stealth. Shorter luff lengths deliver a softer feel, the new tack cam locks in the power, and the outline and shaping have been tuned for maximum top speed and control. Factor in the easy handling and early planing of the original, and you have a brilliant sail for those wanting full race performance without the hassle of an ultra-wide sleeve.

### Design

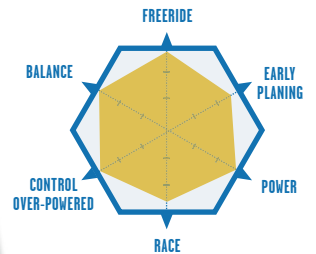

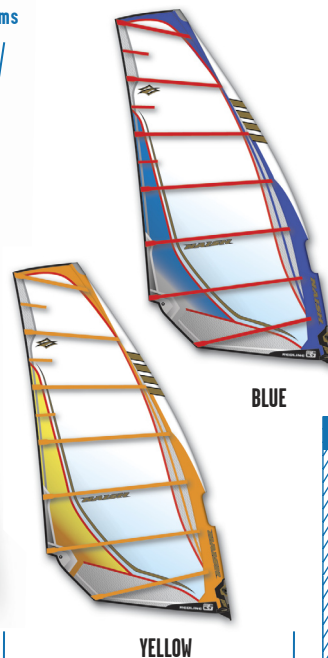

- Twin X-ply luff panels build in power
- (3) Cams and (4) Tube/Rod battens add stability and control
- Shorter luff lengths and new shaping deliver improved top speed and handling over-powered

### Construction

- X-ply in key areas make it tough and light
- Radial tack and clew deliver ultimate strength
- New patch designs save additional weight

### Technical Features

- New tack fairing protects your board
- Tack strap makes rolling sail a cinch
- PVC seam protection in tack area eliminates chafe

SIZE	LUFF	BOOM	MAST
