Performance

The 2007 Stealth represents the first significant evolution of the 'Wide Sleeve Concept' with the introduction of the 'Twist-Loc'™ sleeve design. Wide at the bottom means a flat entry for top speed and pointing, a deep, powerful shape for acceleration and maximum glide through the lulls, and incredible over-powered shape stability. Narrow at the top means improved dynamic twist, lighter weight, and faster recovery from crashes because the sleeve retains only slightly more water than a Freeride sail. Combined with the World Speed Record pedigree, this is the ultimate racing and extreme high performance sail.

Design

- 'Twist-Loc' sleeve design adds power AND free twist for better handling over-powered
- New shaping geometry for more dynamic twist
- (4) Cams and (6) Carbon Tube/Rod battens add stability and control.

Construction

- X-ply in key areas make it tough and light
- Radial tack and clew deliver ultimate strength
- New patch designs save additional weight

Technical Features

- New tack fairing protects your board
- Tack strap makes rolling sail a cinch
- PVC seam protection in tack area eliminates chafe

SIZE	LUFF	BOOM	MAST
4.2	378	150	370 RDM
