

SP**60, 80, 95, 110, 128, 135****PERFORMANCE:**

The 2009 Naish SP line began with our proven shapes, which were refined over a year of intensive testing and development to produce the best and most accessible slalom boards we've ever made. This year, we have added the new SP 135 for even lighter wind performance. The SP 60 currently holds the record for the world's fastest GPS speed, and the entire range offers nearly effortless speed and make it easier than ever for sailors to achieve pro level performance.

WHAT'S NEW:

New SP 135: Based on feedback from light wind racing, the Naish team worked with shaper Richard Greene to create a new larger board that combines excellent top speed with user friendliness that is unequalled.

Cut outs on SP 80 and 95: these proven shapes now feature tail cut outs to reduce wetted surface and increase top speed.

Improved Ergonomics: foot strap positions have been fine-tuned, increasing comfort and control at high speeds.

New Carbon Sandwich Construction with Technora reinforcements in the main stress areas: This layout combines the light weight and stiffness of a carbon deck and bottom with incredible impact strength due to strategically placed Technora reinforcement patches.

- All Naish SP Slalom Boards are ISAF-registered

**SP**

VOLUME	LENGTH	WIDTH	FIN TYPE	SAIL RANGE
60	222	48	Slalom 28	4.2 - 6.5
80	231	56	Slalom 28	4.6 - 6.5
95	241	59	Slalom 32	5.2 - 7.0
110	241	65	Slalom 38	5.8 - 7.8
128	245	76	Slalom 44	6.4 - 8.8
135	250	82	Slalom 48	7.0 - 10.0
