## PERFORMANCE:

The Naish Stealth is a no compromise wide sleeve race sail that delivers powerful acceleration and effortless top speed. A new shaping technology has allowed us to build the record breaking Stealth with just 7 battens up through the 8.8, and the resulting lighter weight is a huge advantage both for pumping and for transitions. This sail is not for the faint of heart!

## WHAT'S NEW:

- **Ongoing development:** The new Stealth is an evolution of the breakthrough 2008 design with the focus on improved cam rotation.
- **Light weight Composite Sleeve:** A new sleeve design uses scrim in the high stress areas for a cleaner leading edge and improved rotation.
- **2nd Generation 3D Shaping:** originally developed for the 2008 Stealth, this shaping technique results in nearly limitless top end control due to increased twist at the lower leech, while a deeper entry and chord in the boom area improves low end acceleration and early planing.
- **All New Tack Faring:** This new design adds 360 degree protection at the base and an easy-to-use velcro closure while retaining the unique Naish 'fold back' feature for quick, uncomplicated rigging.
- **New Head Protector:** In a continuing effort to make sure that every finish detail on Naish sails leads the industry, we have developed a new low profile head protector.
