

formula II

**WITH THE NEW PATRIK FORMULA V2 WE ARE THE FIRST BRAND USING
"WINGS" ON A PRODUCTION BOARD – A NEW ERA BEGINS!**

**THE VERY SPECIAL PROJECT WAS TOP SECRET UNTIL THE LAST DAY OF
REGISTRATION AND ALREADY NOW - ONLY ONE WEEK LATER - IT CAUSES A LOT OF
AGITATION FOR THE RIDERS AND OTHER BRANDS.
ACCORDING THE DECISION OF THE INTERNATIONAL SAILING FEDERATION A COPY OF
THE ADJUSTABLE WINGS IS NOT PERMITTED AND THE „PATRIK FORMULA V2“
WILL BE THE ONLY BOARD WITH THIS ADVANTAGE ON THE MARKET.
IT IS CLEAR AND PROOVEN THAT MULTIPLE BOARD OFFERS ARE NOT PRACTICAL AND
TOO COSTLY. THE FUTURE LIES IN THE ADJUSTABLE OPTIONS AND WE ARE PROUD
TO BE THE PIONEERS IN THIS NEW ERA OF PRODUCTION BOARDS.**

LEAD - DON'T FOLLOW!

NEWS SECTION

Custom Heel Plates - not permitted

As a result of a request to ISAF for a "class rule interpretation" - we have been advised that the use of heel plates may not comply with our class rules.

Heel plates are a device that when applied to positions for footstraps (using same inserts) enable the rider to position themselves above the normal hull deck and even further outside (off board) the normal sailing position. Only boards that come supplied with heel plates - ie as a standard option, and part of the hull design, as registered with ISAF - will be deemed class legal.

The use of custom heel plates is rare, and therefore the implications of this ruling are minor; but if you are in any doubt concerning this rule clarification please contact: fw@internationalwindsurfing.com
