SERVICE

ORDERING QUICK AND EASY

Tel: +49 (0) 6893 80110

Fax: (+49) 6893 70628

You can reach us personally from Monday to Friday, 09.00 to 18.00, otherwise just leave a message on our answering machine.

Or very fast and simple:

WWW.GUNSAILS.DE

service@gunsails.de

For UK + Ireland: Personal advice available from 07.30 to 16.00, Monday to Saturday.

Hotline: 0208 715 0040

www.gunsails.co.uk or mail to:

info@gunsails.co.uk

UK + Ireland fax orders: 0208 395 8595

EASY PAYMENT

We accept **VISA and Mastercard**.

Within certain European countries, it is also possible to pay via cash on delivery.

For further details, please contact our office.

INFORMATION SERVICE

Should it occur that one of your ordered articles is not in stock at present due to a great demand, we will inform you about this per email or telephone.

DELIVERY WITHOUT RISK

Have you placed your orders in our headquarters in Germany, your articles will be dispatched by UPS.

For freight charges, please have a look at our homepage www.gunsails.de or mail us to service@gunsails.de

UK + Ireland customers mail to info@gunsails.co.uk

24 H DELIVERY SERVICE

If you order with a German delivery address, we can offer a 24 hours delivery service.

We are sorry but for deliveries abroad, we are not able to do Express shipments.

EXCHANGE SERVICE

Of course you can exchange or return articles within 14 days. Just contact our head office.

GUARANTEE OF QUALITY

All Gun Sails products are subject to a strict quality control. Sails and masts carry a 24 month warranty, all other articles carry a 12 month warranty.

WWW.GUNSAILS.DE

OUR ONLINE SHOP "GUN STORE"

Meanwhile, most of our orders come via our website. We are permanently enlarging our product choice and the services in order to make online shopping even easier for you. For most of the products, we show more details and pictures on our homepage and with one click on our shopping cart, you can order them directly. You can create a customer account, secured by a password, where you can manage your data, get buying recommendations, see your visited products and you are informed by e-mail about the status of your order, including the tracking number of your parcel.

MENU

NICEPRICE

The special section for grabbing a bargain. No matter if you are looking for test sails, exhibition models or discontinued goods, definitely you can make a good deal there.

TEST REPORTS

What is the international trade press writing about Gun Sails products? Here you will find current test reports as well as the ones of the last years in order to get an impression.

GUN SAILS TODAY

Our newsletter Gun Sails Today is released every 5-6 weeks. Here, you will be the first to know about new products, test events, special sales promotion and much more. Some of our special offers are exclusively for our newsletter subscribers, it's worth subscribing to it, of course free of charge, and sure you could unsubscribe from it at any time.

NEWS

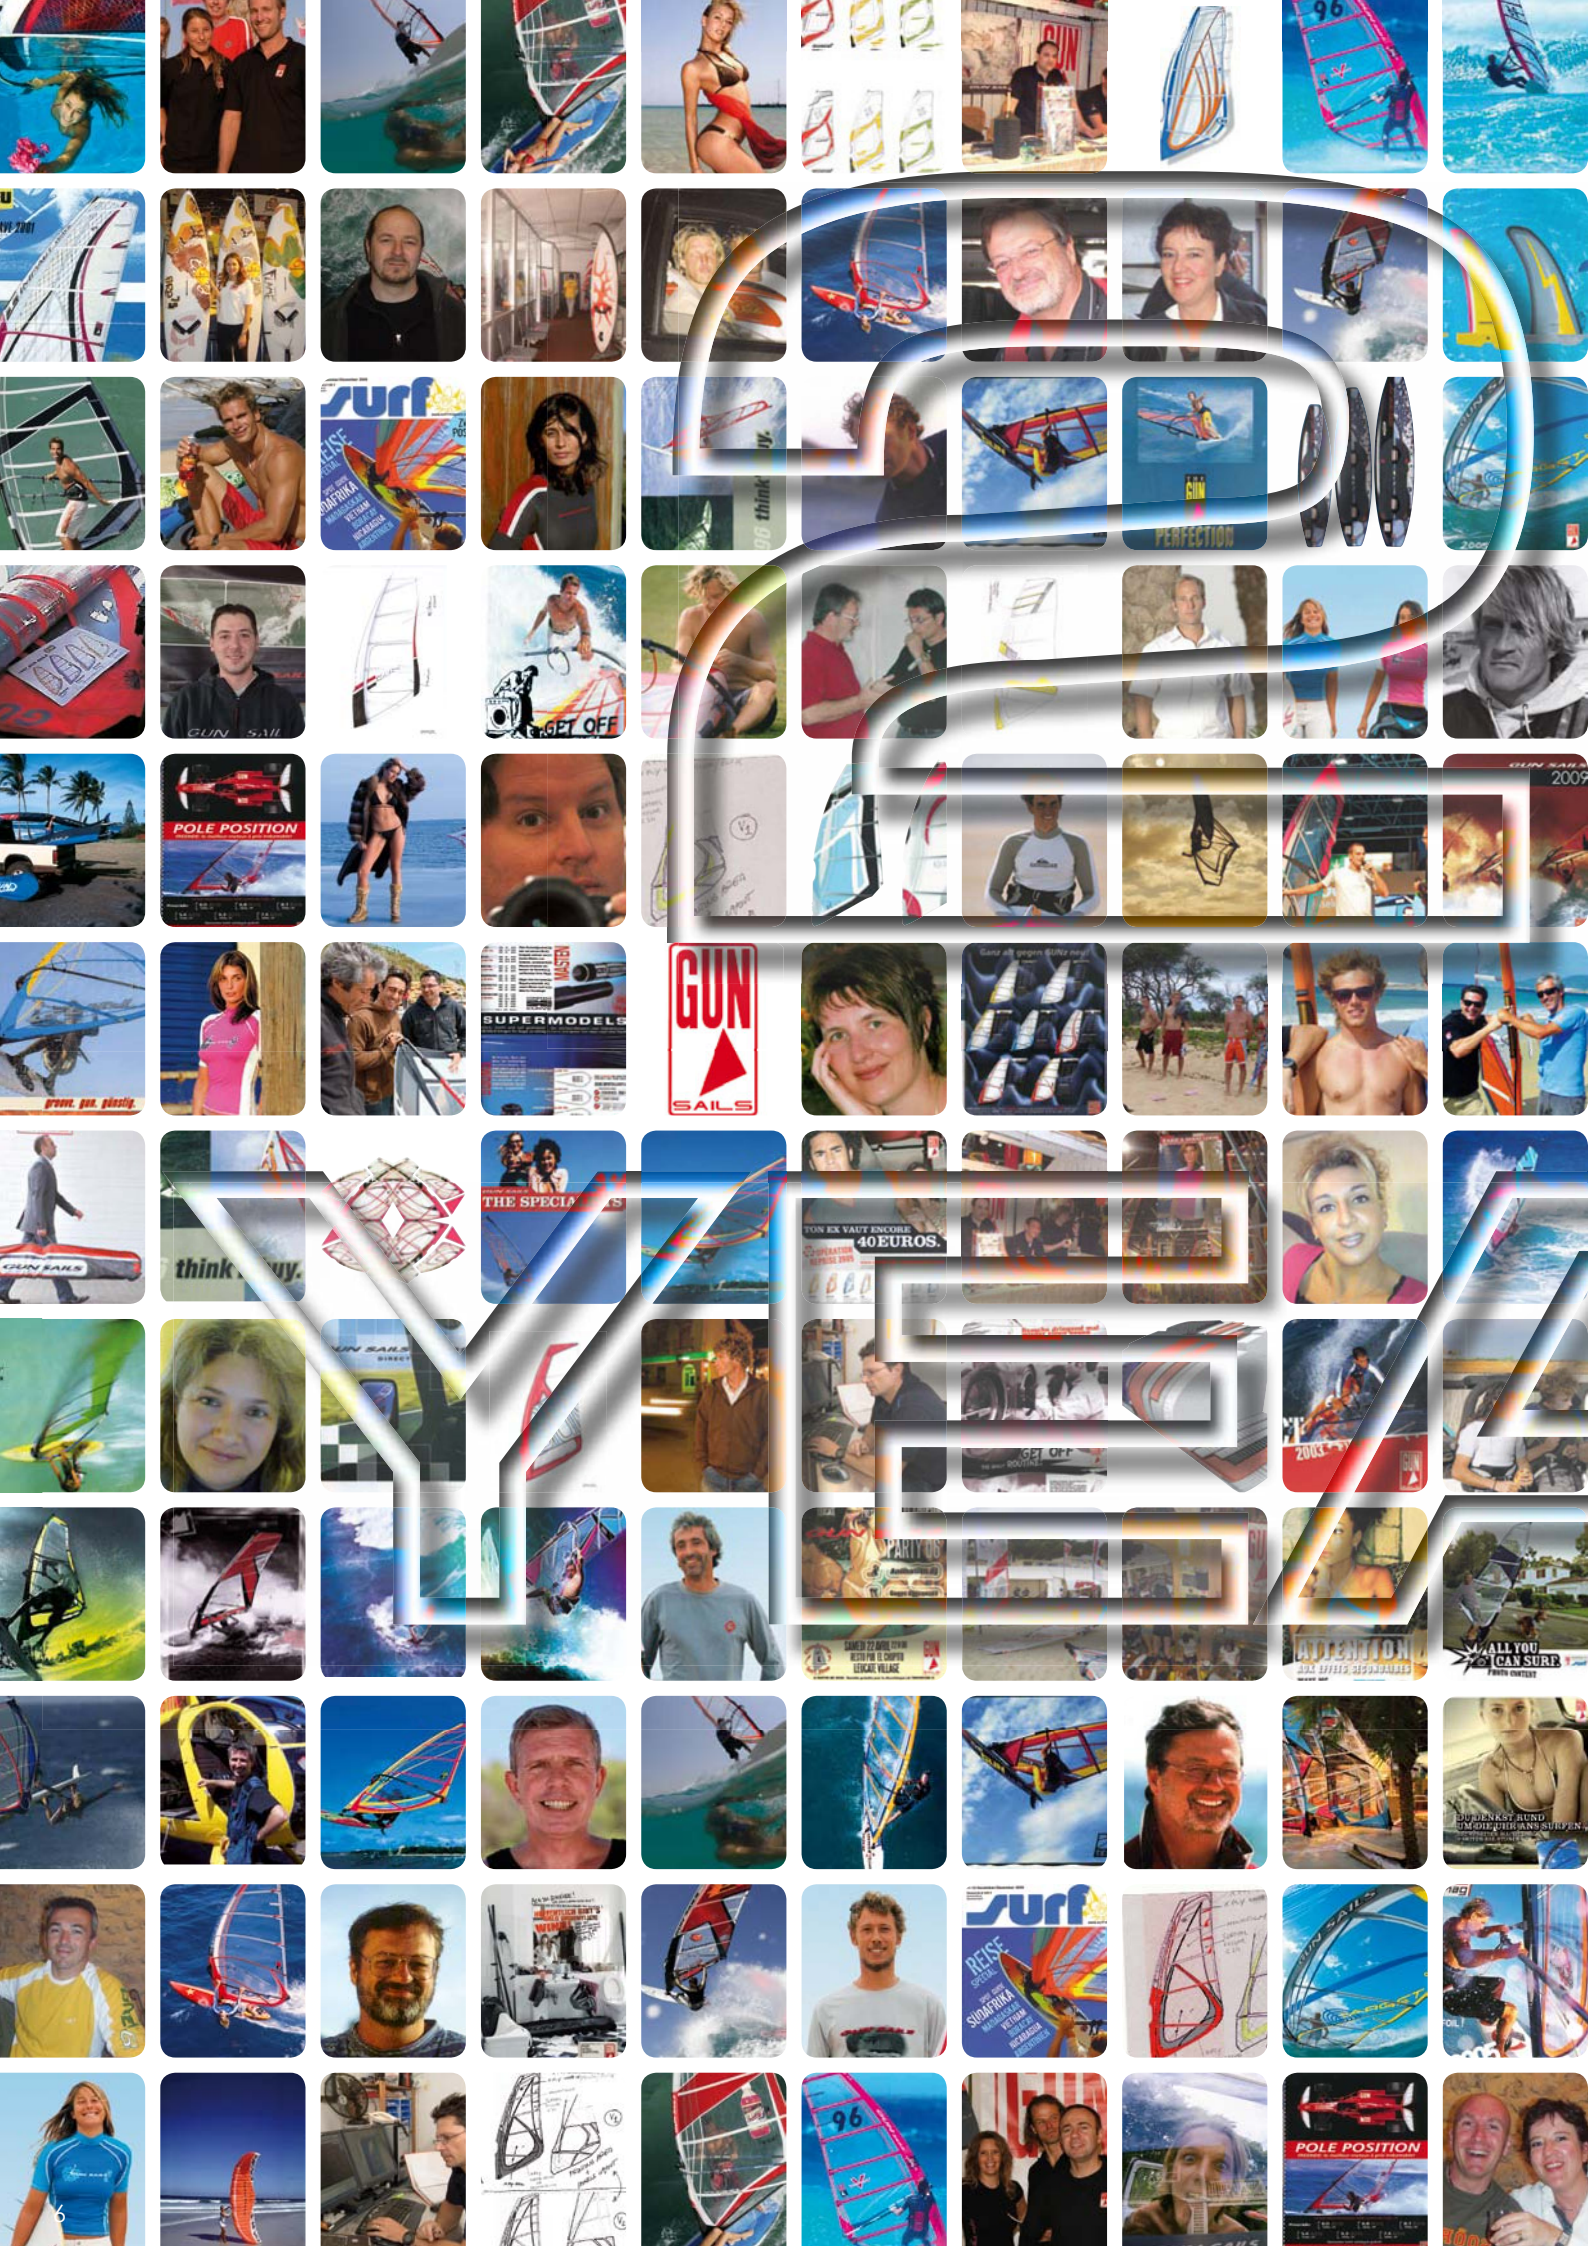

News about products, test events, insider stories, reports from our team riders, with just one click to our news section you are always up-to-date.

DOWNLOADS

Check out our download centre for rigging guides and flyers, tips on our product range, wallpapers, action shots, all can be downloaded free of charge.

GUN SAILS 25 YEARS We celebrate our brand anniversary and would like to thank all who supported and accompanied us during the past years: Customers, suppliers, staff, media partners, team riders, fans, friends, designers, photographers.... **THANK YOU!** May the next 25 years be as exciting and successful as the past. What is a celebration without gifts? We'll present you during the year some great offers – don't miss it. Subscribe to our newsletter on www.gunsails.de and keep yourself up to date.

2012 WHAT'S NEW ?

Renato MORLOTTI
Sail Designer

2012... WHAT'S NEW ?

Fresh designs, new colours, two completely new sail lines and loads more updates, that make your favourite hobby even more exciting.

A lot has been modified on the sails. But not only that, we have a new colour scheme for our bag collection, brand new profiles and materials for the harnesses, we even gave a powerful "step on the gas" in our accessories range. Also for the young guns, we worked flat out. We redesigned our youngster rig Dragon and with the Burner, we have released a brand new setup for beginner and intermediate levels.

You will find all these new products here in our new catalogue and of course on our homepage www.gunsails.de

INTELLIGENT MATERIAL MIX

We have never aimed at building the lightest sail of all. Gun Sails sails are very stable which has proved itself. We offer a favorable sail with which you can have fun with for a very long time and where you don't have to miss anything. This is also praised by the trade press:

"The Transwave impresses overall with a very high-quality workmanship and love for details..." Windsurfing Journal Test special 2011.

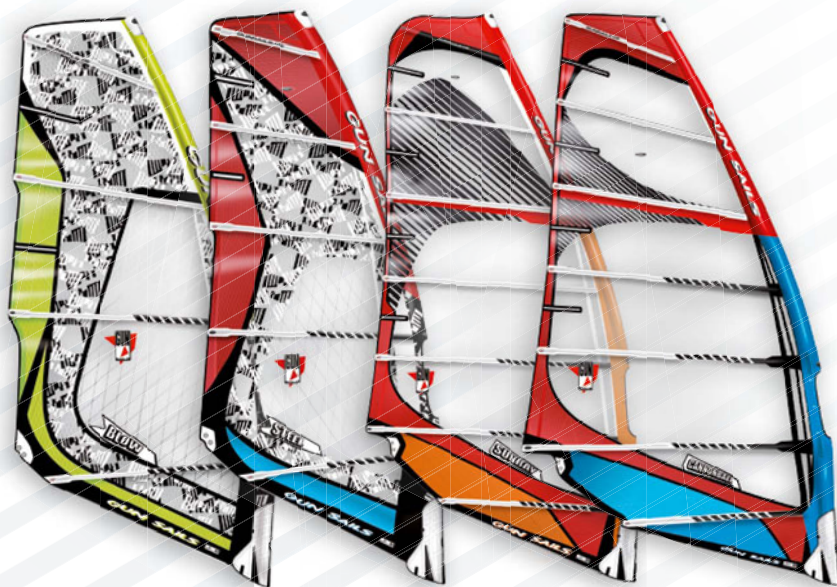

"Besides you will get at a favorable price all important features, solid reinforcements and a very solid X-Ply construction" surf Magazine 3/2011 (Steel test report).

In order to guarantee the longevity and optimal shape stability of your sail, our sails are made out of an intelligent mixture of distinctive X-Ply materials and stable monofilm strength. You will recognize the stability and quality of our sails directly after the unrolling of your sail... There is no crackle effect.

RENATO MORLOTTI Sail Designer

With more than 30 years experience, including 13 years as sail designer for Gun Sails, Renato Morlotti is the brain behind our successful sail line. His attention to detail and his drive for perfection are legendary and the guarantee for you to hold a first class sail in your hands. Renato is not only focused on the sail performance; longevity and usability are very important as well. Countless test reports from many windsurfing magazines confirm the flawless processing quality and features of our products and prove that a good sail doesn't need to be expensive.

Philippe VIGNERON
Head of Test Team

THE PASSION FOR WINDSURFING

For 25 years, we have been addicted to one thing: windsurfing, the greatest sport worldwide! Since the beginning we are pursuing the goal to offer you excellent products for a fair price. No matter if you are beginner or pro level, no matter if you sail on lakes or on Maui. Our product range includes all you need from sails to a complete equipment for your perfect day on the water. It's not a secret anymore: In terms of technology and functionality our products belong to the best sails the windsurfing market can offer you. All in one to an unbeatable price-performance-ratio. It's not for nothing that Gun Sails is recognised among the best in the windsurfing sector. Very good test results and the steadily growing customer base confirm the high quality of our products. What's your next sail? Gun Sails is number 1 at the top of the wish-list of German windsurfers, this result was confirmed in the survey of the surf-magazine (04/2011). Something we are very proud of!

Therefore a big thank-you to both, our existing customers as well as our new customers for their trust in Gun Sails. Nevertheless we will not rest on our laurels because of our top ranking. Reasonable innovations year after year guarantee that you hold a current top product in your hands. Our direct marketing concept offers lots of advantages for our customers: Without any distributor we can offer our products at significantly lower prices. In addition we make our own decisions from the first idea to the finished product, that's why we can rely on our comprehensive product knowledge, Development, Sales and After Sales - all under one umbrella. Close customer contact is important for us. Our sales- and service team advises you individually, so you can find the right sail that fits perfectly to you. We live and love windsurfing. Convince yourself of our service, we are looking forward to hearing from you.

YOUR GUN SAILS TEAM

SAIL FEATURES

FRED

FRED Fast Rigging Easy Doing

FRED will help you to find the optimal luff trim for your sail. The mark is found in the upper sail window and serves as an orientation point to create the perfect luff tension (loose leech).

SLEEVE VOLUMER

The Gun Sails logo that is sewn on the sleeve keeps it open at the boom opening area like a clip and thus mast insertion is much easier.

SLEEVE GUARD

The mast sleeve of all camless sails is reinforced in the batten area in order to avoid abrasion.

BOOM POSITION CONTROL

The printed height scale at the boom opening helps you to easily remember your personal boom position.

STRAP ON

For very easy packing away and storage: Just roll the sail up and fix the elastic retainer.

MAST FOOT PROTECTOR

The large mast foot protector can be pulled back whilst rigging. The loop eases the initial pulling down of the sail. The uphaul can be comfortably inserted through an opening in the protector.

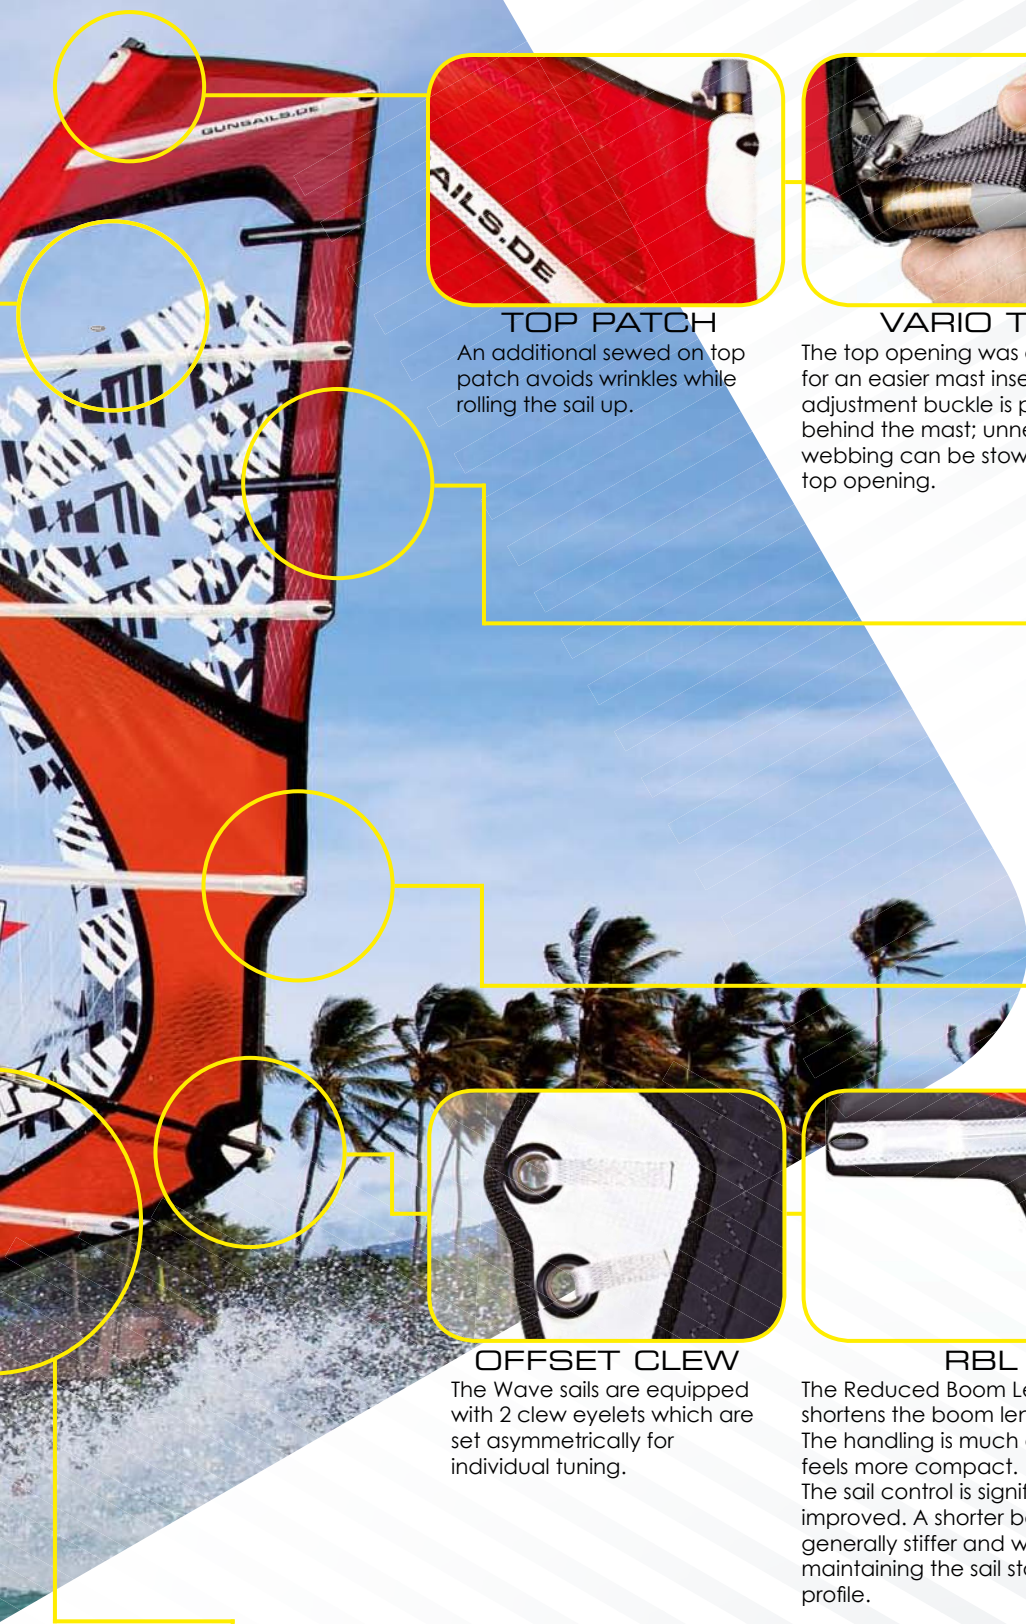

COMFORT PULLEY

The integrated triple pulley has large easy turning stainless brass rolls which greatly reduce the effort required for sail trimming. Also, if you prefer, the rolls are removable to allow the use of standard downhaul pulley hooks.

R. Canille Juban - P. Jeanne Houvet - L. Mail

TOP PATCH

An additional sewed on top patch avoids wrinkles while rolling the sail up.

VARIO TOP

The top opening was enlarged for an easier mast insertion. The adjustment buckle is placed behind the mast; unnecessary webbing can be stowed in the top opening.

TOP GUARD

The large reinforcement with attached PVC edging at the sail top avoids abrasion and wearing out whilst rigging.

MINI BATTENS

Lightweight mini battens take control of the leech while twisting and avoid detrimental leech flutter. In this way, the window fabrics are spared and the longevity of the sail is predefined.

OFFSET CLEW

The Wave sails are equipped with 2 clew eyelets which are set asymmetrically for individual tuning.

RBL

The Reduced Boom Length design shortens the boom length. The handling is much easier and feels more compact. The sail control is significantly improved. A shorter boom is generally stiffer and will assist in maintaining the sail stability and profile.

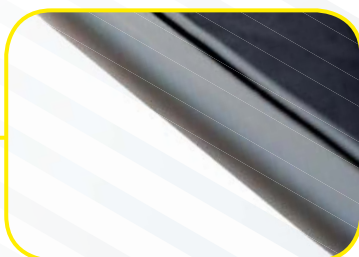

ITB

The Internal Trim Batten system is completely integrated into the batten pocket and the battens can stay tensioned in the sail. The profiled end piece offers additional protection against abrasion.

MULTIPLE SEAM PROTECTION

All seams in the significantly stressed foot area are protected by Dacron coverings.

FOOT GUARD

A PVC edging from foot to the first batten protects the leech edge against your board's nonslip coating.

POCKET GUARD

A PVC braid, sewed on the bottom batten pocket, protects your sail from abrasion while uphauling and waterstarting.

BATTEN GUARD

PVC tabs on the upper batten pockets prevent wearing out and abrasion whilst rigging.

WAVE & FREEMOVE SAILS

BLOW

R: Camille Juban - P: Jérôme Houyvet - L: Maui

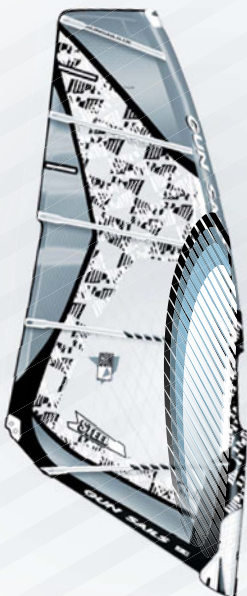

R: Nicola Spadea - P: Jérôme Houyvet - L: Maui

SAIL PROFILE

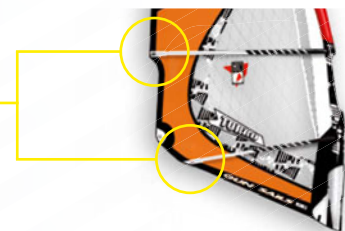

The profile follows the range of use and the characteristics of a sail, which was determined at the beginning of the development. The sail designer can decide whether the profile of a sail will be fixed in the upper area or in the lower part and he can define the profile deepness. A further aspect for influencing the profile and the profile stability is the number, configuration and type of the battens or the use of cambers.

On the graphics you can see the distinctive profile of the stated sails.

-  TORRO
-  TRANSWAVE
-  STEEL
-  BLOW

SBS

SYMMETRICAL BATTEN SYSTEM

On camless sails, the batten above the boom section is positioned on the opposite side. In this way, the sail becomes equally balanced, especially in the area with the most profile and where the sail window is the largest.

BLOW

FROM
359 €

R: Camille Juban - P: Jérôme Huyvet - L: Maui

BLOW

Light, radical and powerful. With the 4-batten sail BLOW we have extended our wave sail line with a real "easy to handle jewel". Short luff, compact boom length, excellent drive and 100% X-Ply construction, you need nothing else to handle all kind of waves.

You will be surprised with the impressive acceleration and the early planing of the BLOW. As for the top speed and wind range, it will do as well as the Steel, whereas it will feel lighter and easier than the Steel. You will also notice the moderate mast curve and low luff tension when rigging and you will just enjoy the amazing handling abilities in each maneuver and turn, everything will be very easy and smooth with our new BLOW.

Like all our wave sails, the BLOW can also be used with standard diameter masts (SDM) as well with reduced diameter masts (RDM). You will become addicted to the feeling of holding a square metre less.

So, let it BLOW!

KEY FACTS:

- Reduced weight 4 batten wave sail
- Short compact outline for more control and radical maneuvers
- Offset clew for individual trim
- 100% X-Ply construction for maximum demands
- Completely compatible with RDM and SDM

STEEL

FROM
355 €

STEEL

From Capetown to Hawaii – no matter where you ride the waves: the STEEL will be the right choice to enjoy pure wave riding. Our all-round wave sail is characterized by a well balanced handling and a huge range of use. It feels neutral in waves but has nevertheless enough power to get you through holes, white water and breakers. With one trim only you can cover a maximum wind range. You rather prefer a compact, absorbed feeling? No problem at all, the two clew eyelets enable an individual tuning from compact to powerful. The solid construction makes the STEEL to be your perfect and reliable partner in demanding conditions. This is also guaranteed by sophisticated improvements in the stress zones and the intelligent mixture of different kind of X-Ply materials. Should the conditions get rougher, the Dacron panel at the mast sleeve will absorb the gusts so that you can fully concentrate on your next maneuver. Being extremely stable and controllable, the STEEL is also appropriate for the use in strong winds for all kind of levels.

STEEL 2012 – Ready when you are!

KEY FACTS:

- 100% X-Ply construction for maximum demands
- Perfect on/off combines power and neutral handling
- Offset clew: Two asymmetrically set clew eyelets for individual fine tuning
- Better absorption in gusts by Dacron mast panel
- Completely compatible with RDM and SDM

TRANSWAVE

FROM
319 €

TRANSWAVE

Looking for more drive and power in waves? Our TRANSWAVE is your best choice. With its slightly deeper profile, compared to the Steel, it feels more direct and has more planing power to bring speed into your next turn or blast you over the next wave. Not for sailors with fear of heights...

Not only in waves, but as well in flat water conditions the TRANSWAVE impresses with a brilliant performance thanks to its early planing power and the fast sail rotation. Characteristics such as a stable centre of effort, controllability and stability (75% X-Ply construction) are self-evident for this sail. In addition to that, it is equipped with the same features which mark our Steel: Dacron panel for more elasticity and two clew eyelets for individual trimming. It meets perfectly all the requirements of a power wave sail and covers an immense range of use.

The TRANSWAVE 2012 will take you to your limits – Ready to follow?

KEY FACTS:

- An extra bit of power for more planing performance and more lift
- Extremely wide range of use thanks to its individual tuning
- 75% X-Ply construction for longevity
- Completely compatible with RDM and SDM

TORRO

R. Camille Juon - P. Jérôme Houvet - L. Mouj

TORRO

Curtain up for the new TORRO 2012!

Our versatile bestseller TORRO, already achieved last year's best results from the International trade press, e.g. the German surf magazine (05/2011). "The Torro impresses traditionally as a very good maneuver sail with balanced performance."

"Early planing, acceleration, speed, handling. There is nearly no way to do it better."

For a bump-and-jump use with a crossover board, the Torro is really powerful and brings an incredibly amount of fun", this was the evaluation of the German Windsurfing Journal (07/2011) of our allrounder. There is not much to add... The TORRO is a classic freemove sail and is suitable for sailors of all levels. It perfectly combines wave, freestyle and freeride characteristics in one package. No matter whether you want to do an excursion into waves, some freestyle maneuvers, or do some easy-going cruises, the TORRO is your perfect partner for simply everything.

Easy handling, a stable centre of effort and speed potential will guarantee an unlimited sailing enjoyment. Only the setting sun will terminate your sailing session.

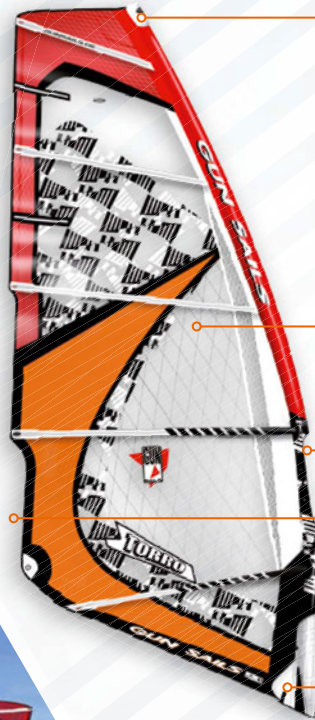

The TORRO already enthused plenty of windsurfers world-wide. When will it convince you?

KEY FACTS:

- Extremely versatile, for wave, freestyle and freeride use
- Optimal combination of handling and performance
- Size-specific batten configuration
- 65% X-Ply construction for longevity
- Completely compatible with RDM and SDM

SELECTED DETAILS

SAIL PROFILE

Compared to NoCam sails, camber sails have a "preloaded" profile, so you will get earlier into planing. NoCam sails need incoming wind to build their profile. Due to clever allocation, number and type of battens, the profile stability of NoCam sails achieves today a similar level as camber sails. Basically NoCam sails are a bit easier to handle and the smaller mast sleeve makes the waterstart very easy for everyone. The illustration below demonstrates the different profiles.

TACK STRAP

The Cannonball and the Mega X sails are equipped with a tack strap that helps you to trim the foot even more precisely.

ROLL CAMS

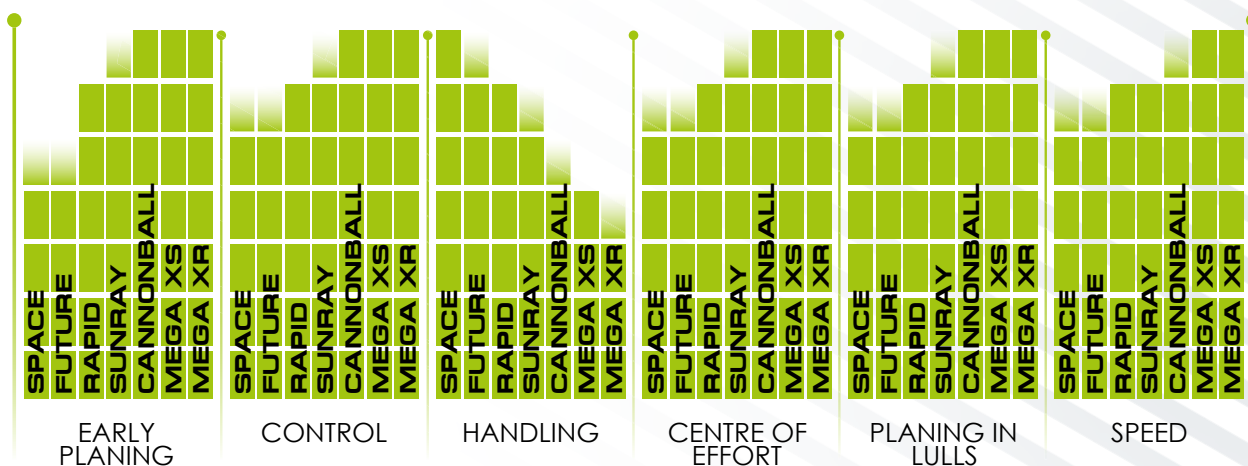

Using roll cams, the sail rotation is much smoother. The special rollers located on the outside are simply "rolled" onto the mast whilst rigging without any great efforts.

FLATWATER SAILS

PERFORMANCE CHART

The data of the **Wave & Freemove** sails cannot be compared to those of the **Flatwater** sails.

SPACE

FROM
359 €

R: Nicola Spadea - P: Jérôme Houyvet - L: Maui

SPACE

The SPACE is the ideal power pack for blasting, bump and jump conditions and all kind of basic freestyle moves. It combines the qualities of our freemove sail Torro and the classic freeride sail Future. Amazing handling in combination with early planing power and more speed, whereas it always will keep a very stable centre of effort. You will only need one trim to cover a huge wind range. Having a medium cut foot, the SPACE does not have the wave suitability like the Torro has, therefore the deeper profile will make you blast earlier. Depending on the sail size, the batten constellation is focused on better handling or more speed.

With its easy controllability, the outstanding handling abilities and its solid construction (55% X-Ply), the SPACE is the perfect fun board engine for all kind of levels.

A Crossover Sail as it should be!

KEY FACTS:

- Intelligent batten concept, 5 battens without tube to 6 battens/3 tubes depending on sail size, for more handling or more performance
- 55% X-Ply construction for maneuvers
- Perfect combination of speed and handling thanks to its moderate foot
- Completely compatible with RDM and SDM

FUTURE

FROM
329 €

FUTURE

Plug and play – that's the motto for our classic freeride sail FUTURE: Just hang in and enjoy!

Early planing power and easy handling are the key characteristics of this sail, that makes it to be a top choice for sailors of all kind of levels, from jibe improvers to long distance blasting. The FUTURE accelerates easily to its top speed whereas it always keeps its stable centre of effort and stays a forgiving sail. It rotates very smoothly in jibes and gets you quickly back on your blast again. If you are looking for an uncomplicated freeride sail to do some easygoing cruising, here it is. You will also be amazed by the easy and simple rigging: With only one trim, you can cover an immense wind range. Forget all the annoying re-trimming you might have had before. Even in gusts you will need only one setting. The balanced profile with – depending on sail size – two to three tube battens guarantees an unlimited freeride fun. Now the small sizes can also be used with a high percentage RDM mast thus giving an even better handling with nearly the same performance.

The sail of the FUTURE, the name says it all.

KEY FACTS:

- High rigging comfort
- Intelligent batten concept, 5 battens/2 tubes to 6 battens/3 tubes depending on sail size
- Very stable centre of effort and planing power
- Reduced boom length (RBL) for more control and easy handling
- Solid X-Ply construction for longevity

RAPID

Fortunately there are no speed cameras on the water. Otherwise you should be very careful with your RAPID: it is the fastest model of our camless sails and it was designed by Renato Morlotti for pure performance. Hang in, step into the foot straps, close the gap – and off you go for the ride of your life! While the others are still trying to get on, you will be a distant memory... Although it shows similar performance of a race sail, it has the handling comfort of a freeride sail. Early planing and constant propulsion make you power away. Compared to the last year's model Renato Morlotti has reduced the luff length of the bigger sail sizes. The Rapid is now more compact and easier to control. Thanks to its higher profile tension and the 7-batten construction, the RAPID "comes very fast to an amazing top speed" (Windsurfing Journal 03/2011). You don't have to worry about holes in the wind, you will just plane on. Now the small sizes can also be used with a high percentage RDM mast thus giving an even better handling with nearly the same performance.

Formula 1 for everybody: Get ready for the new RAPID!

KEY FACTS:

- Camless freerace sail with the freeride handling characteristics
- 7/4 cross batten concept for maximum profile stability and better laminar flow of the sail
- Easy handling thanks to reduced boom length (RBL)
- Slim mast sleeve for an easy waterstarting
- 2 clew eyelets for individual tuning

Top Guard: large reinforcements at the head with additional PVC piping

Slalom Outline for top performance

Slim and camless mast sleeve for easy sailing and rigging

Reduced Boom Length (RBL) concept for better handling

Less downhaul effort required due to **comfort pulley** with easy turning rolls

**NO CAM
FREERACE**

SUNRAY

FROM
379 €

SUNRAY

The brand-new SUNRAY is the follow-up model of our successful twin cam freerider Escape. It combines with its deep profile and the compact handling the perfect mixture of race feeling and pure fun.

Our sail designer Renato Morlotti hasn't rested on his laurels and provided the SUNRAY with a slightly wider mast sleeve and a new batten configuration with two battens below the boom in the cross batten concept and an additional lightweight top batten. This alteration has extended the wind range at both ends of the scale - with full control in the limit zone.

Supported by two cams, the SUNRAY is a real early planing machine: it accelerates you even faster from 0 to 100!

Forget all the worries about a difficult rigging: The cams will be rolled onto the mast afterwards and thus an easy rigging is guaranteed.

This sail is made for performance-oriented sailors addicted to the thrill of speed and still keeping an eye on a comfortable freeride-feeling.

KEY FACTS:

- Two roll cams for smooth rotation
- New 6 plus 1 cross batten concept with 3/4 tubes for more control
- Easy handling thanks to reduced boom length (RBL)
- Medium sized conical mast sleeve for an easy waterstarting
- 2 clew eyelets for individual tuning

CANNONBALL

FROM
399 €

R: Josh Angulo - P: Jérôme Houyvet - L: Maui

CANNONBALL

You are crazy for enormous planing power, acceleration and high end speed without any limits? With our CANNONBALL, you will get a secret weapon for freeracing without compromises. Don't say, we didn't warn you... With the new 2012 model you do not have to be afraid of any challenge from your friends for a race – the CANNONBALL will give you maximum power to finish 1st place every time with a big smile on your face.

The sail is equipped with 3 roll cams which fix the centre of effort. You will be thrilled by the controllability and the top speed of this race sail, and above all you will dominate your pursuer. Renato Morlotti has slightly reduced the top area in order to improve the control in high winds. At the same time, the boom length has been minimally enhanced which supports the early planing performance and the stability.

But don't worry, this high-tech speed machine isn't only to be handled by pros, also sailors with intermediate level can tame it: With only one trim you will cover a huge wind range. The three roller cams can be rolled onto the mast afterwards and will then rotate very smoothly. To avoid that your visibility isn't affected, Renato Morlotti designed the 2012 CANNONBALL with a transparent X-Ply mast sleeve.

KEY FACTS:

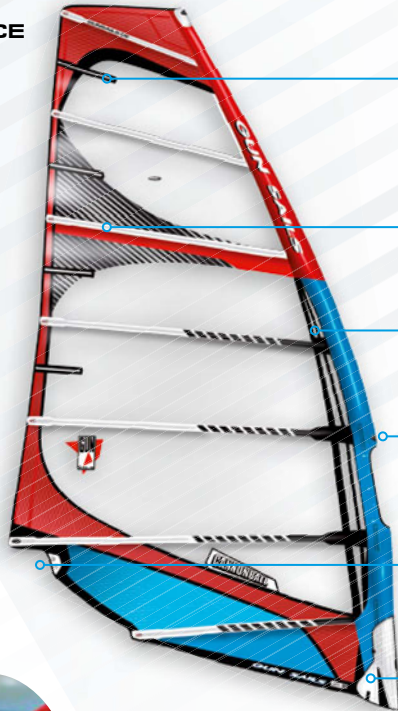

- New transparent mast sleeve material for more visibility
- Best early planing abilities and maximum control at top speed
- 3 roll cams and 7/4 batten configuration in cross batten concept
- Compact feeling by reduced boom length (RBL)
- 2 clew eyelets for individual tuning
- Tack strap for adjustment of foot tension

DISCIPLINE

MEGA X

Mega Acceleration, mega Speed, mega Racing.

Our MEGA X line stands for mainly one thing: Pure performance without any compromises!

This sail is definitely designed for sporty orientated racer and regatta sailors.

More performance isn't possible. The know-how of the past 25 years and the constant advancements are the crucial key facts which guarantee a sail that is only made to experience incredible thrill of speed.

Four cams and the deep centre of effort provide the MEGA X with superb controllability, even when others are already coming in to use a smaller sail. The cross batten concept improves the aerodynamics of the sail and keeps the profile stable. This in combination with the wide double-profiled mast sleeve shape excels in a really amazing top speed that you don't want to miss anymore.

Due to the harmonic twist it feels balanced in your hands, even in gusty conditions.

Breaking speed limits - that's what the MEGA X is made for!

KEY FACTS:

- Size specific batten configuration 7/5 or 8/5 in cross batten concept
- 4 roll cams for smooth rotation and easier rigging
- Aerodynamic, wide mast sleeve shape out of transparent X-Ply in the lower area for more all-round visibility and lightweight Lektra in the top area
- 3 clew eyelets for more trimming flexibility
- Tack strap for adjustment of the foot tension

MASTS

A.C.E.S. CONCEPT

With over 40 different kind of models, Gun Sails offers the most extensive mast range of all sail producers. Thanks to our A.C.E.S. mast line everyone can find the right mast to suit their personal performance requirements. And at the same time, you can remain focussed on the budget you want to spend for each performance level.

The most important component for a sail is the mast, both act as one unit.

As a sail manufacturer, we guarantee of course that all recommended Gun Sails masts perfectly fit our relevant sails and that the maximum performance can be reproduced.

Technical criteria such as length and stiffness (IMCS) are almost standardized with all mast providers, differences can be found in the bending curve.

Thanks to our Constant Curve bending curve which is unmodified for years, you can on one hand also use older Gun Sails sail models with our current masts, and on the other hand, our masts are also compatible with most of the sails from other brands.

The high quality standard in material and workmanship, permanent tests in the laboratory as well as in our R&D loft in Tarifa guarantee a constant product quality and durability.

From the Advantage to the Select, all Gun Sails masts are produced in high specification Prepreg Carbon Technology, whereas the carbon quality and percentages mark the separation between the different models. The individual material layers with precisely measured resin percentage are bonded in constant temperatures under high pressure in the well proven autoclave procedure. This process in combination with the high-quality materials guarantees the best results in mast response, durability and an optimum of weight.

So you can be very sure: No matter which model you opt for, you will receive a quality proven Gun Sails product with a 24-month-warranty. All Gun Sails masts are two-part.

SPECIAL SURFACE FINISH

Our masts are equipped, from the Cross Line on, with an exclusive and distinctive surface finishing. The high percentage of reflective particles reduces the aging process of the resin and protects the mast from thermal exposure. The impact strength and breaking resistance are even more increased due to this procedure.

UNIVERSAL TOP FITTING

Our masts are equipped with a universal top fitting. In this way, all of our masts can be used in sails of other brands which use a male pin system instead of a female top cap.

QUALITY CONTROL

Permanent quality controls of all technical data such as bending curve, IMCS data and resilience guarantee an optimal interaction of mast and sail. All our quality masts carry a 2-years warranty.

2 YEARS
WARRANTY

RDM vs SDM

Which mast fits which sail?

RDM, Reduced Diameter Mast, also called skinny mast, indicates masts which have a reduced diameter (33 mm inner diameter of the base) and a nearly uniform profile from base to top.

SDM means Standard Diameter Mast and indicates masts with a standard diameter (48,5 mm inner diameter of the base) and a conical shape running from base to top.

RDM masts carry several advantages:

- Higher impact resistance due to higher wall thickness and reduced mast diameter
- Easier rigging, the skinny mast glides easier into the mast sleeve
- Better handling for waterstarts or in manoeuvres where you grab the mast
- In general an often lighter feeling although RDM masts are often heavier

At "Best Mast" you can see for each sail, if you can use beside a SDM also a RDM.

The wave sails Blow, Steel and Transwave as well as the crossover sails Torro and Space can be unrestrictedly used with RDM.

Usually, the majority of our clients opt for an RDM.

The use of RDM with our camless flatwater sails Future and Rapid can only be recommend restrictedly. For further details, please have a look at the relevant sail pages.

The RDM is not suitable for a use with the camber sails Sunray and Cannonball. These sail lines are designed exclusively for standard diameter masts and get their best performance with them.

The Mega X can only be used in the smaller sizes (<5,6) with a RDM.

ADVANTAGE

The Advantage line is for those looking for a price-point and robust all-round mast with unbeatable price performance ratio. These masts are ideal for beginners and intermediate sailors who look for a versatile and robust carbon mast for wave, freemove or freeride use. Due to the low carbon percentage in the Prepreg technology, Advantage masts have an above-average durability. As real allrounders, they have compatibility with most of the other sail brands.

CROSS

The Cross line means for most of the sailors the entrance to performance-oriented windsurfing. No matter if Wave, Freemove or Freeride, the Cross masts are high-class versatile masts at an affordable price. Carbon percentages around 50% assure a very good relation of weight, dynamics and durability. They combine high overall performance with excellent handling characteristics and great durability. The special surface finish protects them against abrasion and UV degradation. All Cross masts will be delivered including a single mast bag and the RDM masts are additionally equipped with an RDM adapter.

EXPERT

Expert masts are designed for demanding sailors who want to get the maximum performance of their sail. These high performance masts with low weight are highly dynamic and equipped with excellent reflex characteristics. With 70% carbon percentage, your sail will feel significantly lighter. Range of use and control, especially in the upper area, are decidedly improved. Thanks to our surface finish they are perfectly protected against abrasion and UV degradation.

All Expert masts will be delivered including a single mast bag and the RDM masts are additionally equipped with a RDM adapter.

SELECT

The first class choice among the high performance masts. For all sailors who demand peak performance with minimum weight. We only use selected High Modulus Prepreg carbon material where every gram of unnecessary resin is extracted from the carbon meshwork.

Select masts are the "chip tuning" for each sail. Amazing handling and high end performance due to outstanding reflex characteristics will turn your sail into a real turbo. Of course also the Select mast is equipped with the special surface finish which protects the mast against abrasion and UV degradation. All Select masts will be delivered including a single mast bag and the RDM masts are additionally equipped with a RDM adapter.

The Gun Sails boom line follows the A.C.E.S concept of the masts and makes it even easier for you to have the correct components for your complete rig. From the most reasonable Advantage line up to the 100% carbon boom Select, here you will find the right boom to fit your personal needs.

TECHNICAL DETAILS OF THE MODELS CROSS, EXPERT AND SELECT

Solid quick lock boom front end; easy fitting without finger trapping risk from the hinged sleeve closure. Axial suspension, gentle and cushioning to the mast.

Double Pin lock system guarantees a solid adjustment and avoids twisting of the tubes, length adjustment is every 2 cm.

Curve comparison between the standard curve of Advantage and new school curve of Cross, Expert and Select booms. Monocoque front bow construction for more stiffness and ergonomic curve for fatigue-free easy sailing.

Loop to loop rope guide for sizes 140, 150 and 160. Length 180 and more from Cross and Select boom are equipped with a rear end with rollers and can be used with a trim set.

ADVANTAGE

ALUMINIUM

FROM
99 €

Advantage Booms are real allrounders for every kind of use with every sail type. The tube bending is individually set for each length (from narrow to wide), therefore you can use the Advantage boom from wave to race sails. In comparison to the new school curve of the Cross boom, the Advantage line is designed with a classic curve. The fourfold screwed front end can be removed from the tubes at any time for a space saving transport. The axial rotatable front end can be matched with different mast diameters, but for the use with RDM masts you will need an RDM adapter.

Solid quick lock boom front end; easy fitting without finger trapping risk from the hinged sleeve closure.

Double Pin lock system guarantees a solid adjustment, length adjustment is every 2 cm.

Loop to loop rope guide for sizes 140, 150 and 160.

Length 180 and 200 are equipped with a rear end with rollers and can be used with a trim set.

Length cm	Weight g	Sail range sqm	Ø Tube mm	Price EUR

150-200	2500	3.7 - 6.6	29	105,-
160-210	2550	4.5 - 7.2	29	109,-
180-230	2700	5.7 - 8.6	29	115,-
200-250	2900	6.7 - 9.6	29	125,-

CROSS

MONOCOQUE ALUMINIUM

FROM
149 €

The Cross booms are made from high-quality T8 aluminium. Thanks to their monocoque construction (not demountable), the Cross booms have outstanding rigidity values. The tubes of the smaller sizes are produced in "tapering" technology, which means that they have a slimmer diameter for enhanced rig control and feel that has to be experienced to be believed. The tubing gets thicker towards the rear end for more stiffness. From length 180 on, we use a continuous tube diameter of 29 mm for increased stiffness.

The bend characteristics are co-ordinated to the relevant size range.

Cross booms can be used from wave to freerace for all kind of sails.

The modern and ergonomic "new school" curve enables fatigue-free easy sailing, the boom tube is quite straight and therefore the front hand will not be hyper-extended.

Length cm	Weight g	Sail range sqm	Ø Tube mm	Price EUR

BOOMS

EXPERT

HYBRID ALUMINIUM-CARBON

FROM
239 €

The Expert boom is a Hybrid boom for demanding sailors. It combines a T8 Monocoque front part with an ergonomic "new school" curve and a monocoque carbon rear end for more stiffness. The continuous tube diameter of 29 mm in combination with the carbon rear end offers in terms of stiffness and price a very good compromise to a full carbon boom. The bend characteristics of size 150 are designed for wave/freestyle use, the slightly wider size 180 for freeride/slalom.

Length cm	Weight g	Sail range sqm	Ø Tube mm	Price EUR
150-200	2500	3.7 - 6.6	29	239,-
180-230	2670	5.7 - 8.6	29	259,-

SELECT

FULL CARBON

FROM
459 €

Select stands for best performance and absolute high tech. Select booms are built in 100% carbon, therefore they offer a maximum of stiffness and the best stiffness to weight ratio. The bend and diameter of the tubes are co-ordinated to the relevant range of use, depending on the size.

- 140 for wave/freestyle use with continuous 26 mm tube diameter for an easy grip and easy handling.
- 160 for freeride/slalom use with 26 tube diameter in grip area which is extended to 29 mm towards the rear end.

The modern and ergonomic curve enables fatigue-free easy sailing, the boom tube is quite straight and therefore the front hand will not be hyper-extended.

SURF BAGS

SAILBAG

COMBIBAG MASTBAG + SAILBAG

The Combibag provides a safe transit for sails and masts as a single unit. The mastbag can be securely fixed to the bottom of the sailbag with heavy duty clip fasteners. The mastbag can be inserted in a 30 cm long pouch at the front of the sailbag. This provides the whole unit with more security and aerodynamics during transit. During longer trips and a higher speed, and for extra security we recommend you secure the whole combibag to your roof rack by passing the roof rack straps over the complete combibag and through the metal loops (stopping the combibag from sliding backwards or forwards) and around the roof rack.

Both bags can also be used separately.

• Length: 270 cm, Width: 35 cm, Height: 32 cm

YOUNG GUNS

**COMPLETE RIG
FROM
379 €**

R: Maria Andres - P: Jérôme Houyvet - L: Moul

BURNER

"Every beginning is hard." You will be laughing about this sentence after having a session with our brand new BURNER. It was designed for beginners and advanced of all ages. With this lightweight sail you can get your first planing experience, improve tacks and jibes or just enjoy windsurfing. A high X-Ply portion and solid edge protections are key features of our BURNER thus it resists crashes and guarantees longevity. In combination with the fitting components you will easily get to know the world of windsurfing. The super light weight combined with outstanding handling abilities provide you with quick learning success from the beginning on. So what are you waiting for? It was never so easy to start, know it's your turn. The BURNER can also be supplied as a complete rig with matching BURNER MAST and BURNER BOOM.

Size sqm	Boom cm	Mast cm	Top	Batten	Sail price only EUR	Complete rig EUR

Quick lock boom front end

Trim block with quick loop to loop rope guide

DRAGON

The DRAGON was completely reworked by our sail designer Renato Morlotti. The lightweight and solid sail is built appropriately for the kids' needs and thus rigging and handling are literally child's play. The rig will be delivered as a "ready to sail" set. The mast and boom are designed to allow the use with all DRAGON sail sizes so you just have to buy the next bigger sail when your child makes progress and gets older.

The set includes the sail, a two-part adjustable aluminium mast with mast foot, a vario quick lock boom with narrow tubes and an uphaul, all packed together in a transportation bag.

TERMS OF TRADE

ORDERING

You can place orders via telephone, fax, mail or Internet. Please always quote your full name and address as well as the delivery address if it is different from your home address, and your telephone number in case of any question. If you already have a customer number, please let us know as this will speed up the process, and note it clearly. If you have any further question, please do not hesitate to contact us.

DELIVERY

The delivery will be effected by UPS or another reliable carrier appointed by us.

Deliveries abroad

We have standard flat rate freight charges for most of the European countries. You will find these charges on our website at the "Service" section (Shipping costs).

For deliveries to all other countries, we will charge you with the accruing freight costs. Should you need further information on this point, just send us an email stating your required articles and we will let you know the exact amount of freight costs.

Regarding deliveries in Non-EU countries such as Switzerland, Norway, etc., we will only charge you with the net price. The VAT of your country will be charged by UPS when delivering your parcel. In case you receive your delivery in Germany, but then you export the goods in a Non-EU country, you have the possibility of receiving back the German VAT (19 %) by returning the original custom documents, which you will receive at the border when making the custom clearance, to us. Then we will make a money transfer to your credit card or bank account for the relevant amount.

Deliveries within Germany

Freight costs within Germany are € 15,00 for sails, masts, booms and other bulky items; boards: € 40,00 and for smaller items up to 3 kg and neoprene articles € 5,00.

Delivery will be free of charge for 2 sails or a total order amount of more than € 500,00 (except boards).

For articles to be sent later due to unavailability, there will be no additional freight costs.

If you want to pay via Cash on Delivery, an extra fee of 5,00 Euro will be charged.

Damaged Goods

Please ensure that the receiver of the consignment inspects the outer packaging and the contents of all parcels before signing the carrier's delivery note.

If any part of your order is defective or missing, please reflect this on the carrier's note e.g. «damaged in transit» or «1 parcel only received» etc. and refuse delivery of the damaged parcel only and contact us immediately.

A signature of «received in good condition» will void any subsequent claim for damage in transit.

PAYMENT

The prices quoted in our Online Shop are including German VAT (19%).

For the payment of your online order, you can choose between payment via credit card (VISA or Mastercard) or Cash on delivery. COD is possible within EU countries (except Greece and the new EU-countries, within Norway and Switzerland. Another option is an advance payment on our bank account. Should you require a payment in advance, please contact us and we will issue a Proforma Invoice.

In case of payment with credit card, we ask you to state the complete number of the card (16 numbers), the expiry date, the owner of the card and the card verification number, which is on the backside of your card in the signature field, the last three digits. We will charge the invoice amount before despatching the goods.

For a payment «Cash on delivery» a surcharge of € 15,00 will be priced.

RETURN OF GOODS

Items that on reflection you feel are not right for you:

You can return any item within 2 weeks after receipt and we will refund the selling price of the item on condition that the item is returned to us as originally packed, unused and undamaged. The customer will bear the freight costs of the return of articles.

Items that show possible defects in materials and/or production processes:

Should the item show possible defects in materials or production processes, we ask you to notify us about this immediately, whereas probable transport damages should be notified immediately to the driver.

Please return these faulty goods back to us including a brief note describing the problem for us. Please contact us before returning bulky articles in order to find the most favourable way of sending it back. Please understand we will not accept receipt of goods that are not prepaid carriage.

In case of a warranty repair or exchange, Gun Sails will bear the costs of the new delivery.

CHANGES

We reserve the right to make technical alterations for improvement of products and quality without prior notice. There could be minimal differences in colour due to the graphic representation on the screen and our catalogue or changes in production materials.
